## Stereoselective Synthesis 3: Stereoselective Pericyclic Reactions, Cross Coupling, and C—H and C—X Activation

	Preface .....	V
	Volume Editors' Preface .....	VII
	Abstracts .....	XI
	Table of Contents .....	XXV
	<b>Introduction</b>	
	P. A. Evans .....	1
3.1	<b>[m + n]-Cycloaddition Reactions (Excluding [4 + 2])</b>	
	G.-J. Jiang, Y. Wang, and Z.-X. Yu .....	7
3.2	<b>[4 + 2]-Cycloaddition Reactions</b>	
	K. Ishihara and A. Sakakura .....	67
3.3	<b>[m + n + 1]-Carbocyclization Reactions</b>	
	T. Shibata .....	125
3.4	<b>[m + n + 2]-Carbocyclization Reactions</b>	
	C. Aubert, M. Malacria, and C. Ollivier .....	145
3.5	<b>Asymmetric Cycloisomerizations</b>	
	I. D. G. Watson and F. D. Toste .....	243
3.6	<b>Ene Reactions</b>	
	M. Terada .....	309
3.7	<b>Sigmatropic Rearrangements</b>	
	J. Zeh and M. Hiersemann .....	347
3.8	<b>Electrocyclic Reactions</b>	
	B. Gaspar and D. Trauner .....	383
3.9	<b>Allylic Substitution Reactions</b>	
	M. L. Crawley .....	403
3.10	<b>Isomerizations To Form a Stereogenic Center and Allylic Rearrangements</b>	
	S. Jautze and R. Peters .....	443

---

3.11	<b>Allylic and Benzylic Oxidation</b> M. B. Andrus .....	469
3.12	<b>Mizoroki–Heck Reaction</b> M. Shibasaki, T. Ohshima, and W. Itano .....	483
3.13	<b>C–C Bond Formation by C–H Bond Activation</b> H. M. L. Davies and D. Morton .....	513
3.14	<b>Cross Coupling</b> M. Shimizu and T. Hiyama .....	567
3.15	<b>Protonation, Alkylation, Arylation, and Vinylation of Enolates</b> B. M. Stoltz and J. T. Mohr .....	615
3.16	<b><math>\alpha</math>-Functionalization of Carbonyl Compounds</b> D. W. C. MacMillan and A. J. B. Watson .....	675
3.17	<b>Baeyer–Villiger Reactions</b> S. Levinger .....	747
3.18	<b>Ring Opening of Epoxides, Aziridines, and Cyclic Anhydrides</b> J. B. Johnson .....	759
3.19	<b>Acylation of Alcohols and Amines</b> T. Oriyama .....	829
3.20	<b>Asymmetric Fluorination, Monofluoromethylation, Difluoromethylation, and Trifluoromethylation Reactions</b> V. Gouverneur and O. Lozano .....	851
3.21	<b>Stereoselective Polymerization</b> J.-F. Carpentier and E. Kirillov .....	931
3.22	<b>Oxidation of Sulfides</b> A. Lattanzi .....	973
	<b>Keyword Index</b> .....	1017
	<b>Author Index</b> .....	1081
	<b>Abbreviations</b> .....	1113

## Table of Contents

	<b>Introduction</b>	
	P. A. Evans	
	<hr/>	
	<b>Introduction</b> .....	1
<b>3.1</b>	<b>[m + n]-Cycloaddition Reactions (Excluding [4 + 2])</b>	
	G.-J. Jiang, Y. Wang, and Z.-X. Yu	
	<hr/>	
<b>3.1</b>	<b>[m + n]-Cycloaddition Reactions (Excluding [4 + 2])</b> .....	7
<b>3.1.1</b>	[2 + 2]-Cycloaddition Reactions .....	8
<b>3.1.1.1</b>	[2 + 2] Cycloadditions Catalyzed by Transition Metals .....	8
<b>3.1.1.1.1</b>	Chiral Titanium Catalysts .....	8
<b>3.1.1.1.2</b>	Chiral Copper Catalysts .....	10
<b>3.1.1.1.3</b>	Chiral Rhodium Catalysts .....	11
<b>3.1.1.1.4</b>	Chiral Iridium Catalysts .....	12
<b>3.1.1.2</b>	[2 + 2] Cycloadditions Catalyzed by Organic Molecules .....	14
<b>3.1.1.2.1</b>	Lectka's Quinine-Derived Catalysts .....	14
<b>3.1.1.2.2</b>	Fu's 4-Pyrrolidinopyridine Catalysts .....	16
<b>3.1.1.2.2.1</b>	Asymmetric Staudinger Synthesis of $\beta$ -Lactams .....	16
<b>3.1.1.2.2.2</b>	[2 + 2] Cycloadditions of Disubstituted Ketenes with Aldehydes .....	17
<b>3.1.1.2.2.3</b>	[2 + 2] Cycloadditions of Ketenes with Azo Compounds .....	18
<b>3.1.1.2.2.4</b>	[2 + 2] Cycloadditions of Ketenes with Nitroso Compounds .....	19
<b>3.1.1.2.3</b>	Corey's Oxazaborolidine Catalysts .....	20
<b>3.1.1.2.4</b>	Ye's N-Heterocyclic Carbene Catalysts .....	22
<b>3.1.1.2.4.1</b>	N-Heterocyclic Carbene Catalyzed Staudinger Reaction of Ketenes .....	22
<b>3.1.1.2.4.2</b>	N-Heterocyclic Carbene Catalyzed [2 + 2] Cycloadditions of Disubstituted Ketenes with 2-Oxoaldehydes .....	23
<b>3.1.1.2.4.3</b>	N-Heterocyclic Carbene Catalyzed [2 + 2] Cycloadditions of Ketenes with Ketones .....	24
<b>3.1.1.2.4.4</b>	N-Heterocyclic Carbene Catalyzed [2 + 2] Cycloadditions of Ketenes with Azodicarboxylates .....	25
<b>3.1.2</b>	[3 + 2]-Cycloaddition Reactions .....	26
<b>3.1.2.1</b>	Phosphine-Catalyzed [3 + 2]-Cycloaddition Reactions of Allenates with Dienophiles .....	27
<b>3.1.2.1.1</b>	Cycloaddition Reactions Catalyzed by P-Chiral 7-Phosphabicyclo[2.2.1]heptane	28
<b>3.1.2.1.2</b>	Cycloaddition Reactions Catalyzed by Binaphthyl-Derived Phosphines .....	29
<b>3.1.2.1.3</b>	Cycloaddition Reactions Catalyzed by Amino Acid Based Phosphines .....	31

3.1.2.1.4	Cycloaddition Reactions Catalyzed by Planar-Chiral 2-Phospha[3]ferrocenophanes .....	32
3.1.2.1.5	Cycloaddition Reactions Catalyzed by Chiral Thiourea-Containing Phosphines .....	33
3.1.2.2	Palladium-Catalyzed Asymmetric [3 + 2] Trimethylenemethane Cycloaddition Reactions .....	34
3.1.3	[4 + 1]-Cycloaddition Reactions .....	39
3.1.3.1	Rhodium- and Platinum-Catalyzed Asymmetric [4 + 1]-Cycloaddition Reactions of Vinylallenes and Carbon Monoxide .....	39
3.1.3.2	Copper-Catalyzed Asymmetric [4 + 1] Cycloadditions of Enones with Diazo Compounds .....	42
3.1.4	[3 + 3]-Cycloaddition Reactions .....	45
3.1.4.1	Chiral Lewis Acid Catalyzed [3 + 3] Cycloadditions of Nitrones to Doubly Activated Cyclopropanes .....	45
3.1.4.2	Palladium-Catalyzed Asymmetric [3 + 3] Cycloadditions of Trimethylenemethane Derivatives with Nitrones .....	47
3.1.5	[4 + 3]-Cycloaddition Reactions .....	48
3.1.5.1	Asymmetric Organocatalysis of [4 + 3]-Cycloaddition Reactions of Allylic Cations and Dienes .....	48
3.1.5.2	Chiral Lewis Acid Catalyzed [4 + 3] Cycloadditions of Nitrogen-Stabilized Oxyallyl Cations Derived from <i>N</i> -Allenylamides .....	49
3.1.5.3	Rhodium-Catalyzed Asymmetric [4 + 3] Cycloadditions between $\alpha$ -Diazo $\beta,\gamma$ -Unsaturated Esters and Dienes .....	51
3.1.5.4	Palladium-Catalyzed [4 + 3] Cycloadditions of $\gamma$ -Methylene- $\delta$ -valerolactones .....	54
3.1.5.5	Palladium-Catalyzed [4 + 3] Intramolecular Cycloadditions of Alkylidenecyclopropanes and Dienes .....	56
3.1.6	[5 + 2]-Cycloaddition Reactions .....	57
3.1.6.1	Rhodium-Catalyzed Asymmetric [5 + 2] Cycloadditions of Vinylcyclopropanes and $\pi$ -Systems .....	57
3.1.7	[6 + 3]-Cycloaddition Reactions .....	60
3.1.7.1	Palladium-Catalyzed Asymmetric [6 + 3] Cycloaddition of Trimethylenemethane with Tropones .....	60
3.2	<b>[4 + 2]-Cycloaddition Reactions</b> K. Ishihara and A. Sakakura	
3.2	<b>[4 + 2]-Cycloaddition Reactions</b> .....	67
3.2.1	Enantioselective Diels–Alder Reactions Catalyzed by Chiral Lewis Acids .....	67
3.2.1.1	Enantioselective Catalysis Using Chiral Boron Compounds .....	67
3.2.1.1.1	Using a Cationic Oxazaborolidine .....	68
3.2.1.1.2	Using Boronic Acid Esters of Chiral 3-(2-Hydroxyphenyl)binaphthols .....	73

3.2.1.2	Enantioselective Catalysis Using Chiral Copper(II) Complexes	76
3.2.1.2.1	Using a Chiral Copper(II)-Bis(4,5-dihydrooxazole) Complex	76
3.2.1.2.2	Using a Chiral Copper(II)-3-Arylalanine Amide Complex	83
3.2.1.2.3	Using a Copper(II)-DNA Complex	85
3.2.1.3	Enantioselective Catalysis Using Other Chiral Lewis Acids	86
3.2.2	Enantioselective Diels-Alder Reactions Catalyzed by Organoammonium Salts	89
3.2.2.1	Enantioselective Catalysis Using Chiral Secondary Ammonium Salts	90
3.2.2.2	Enantioselective Catalysis Using Chiral Primary Ammonium Salts	94
3.2.2.3	Enantioselective Catalysis Using Hydrogen-Bonded Complexes	99
3.2.3	Hetero-Diels-Alder Reactions	103
3.2.3.1	Enantioselective Hetero-Diels-Alder Reactions of Carbonyl Compounds	103
3.2.3.1.1	Enantioselective Catalysis Using a Chiral Chromium(III) Complex	104
3.2.3.1.2	Enantioselective Catalysis Using Other Chiral Lewis Acids	108
3.2.3.1.3	Enantioselective Catalysis Using Chiral Organocatalysts	110
3.2.3.2	Enantioselective Hetero-Diels-Alder Reactions of Imines and Related Compounds	113
3.2.3.2.1	Enantioselective Aza-Diels-Alder Reaction of Electron-Rich Dienes with Imines	113
3.2.3.2.2	Enantioselective Aza-Diels-Alder Reaction of 1-Azabuta-1,3-dienes	117
3.3	<b>[m + n + 1]-Carbocyclization Reactions</b> T. Shibata	
3.3	<b>[m + n + 1]-Carbocyclization Reactions</b>	125
3.3.1	[2 + 2 + 1] Carbocyclization of Enynes with Carbon Monoxide	125
3.3.1.1	Enantioselective Titanium-Catalyzed Pauson-Khand Reactions	125
3.3.1.2	Rhodium-Catalyzed Pauson-Khand Reactions	127
3.3.1.2.1	Enantioselective Reactions	127
3.3.1.2.2	Diastereoselective Reactions	130
3.3.1.3	Enantioselective Iridium-Catalyzed Pauson-Khand Reactions	132
3.3.1.4	Enantioselective Cobalt-Catalyzed Pauson-Khand Reactions	133
3.3.2	Rhodium-Catalyzed [2 + 2 + 1] Carbocyclization Using Aldehydes as a Carbon Monoxide Source	136
3.3.2.1	Enantioselective Rhodium-Catalyzed Reactions Using Aldehydes	136
3.3.3	Ruthenium-Catalyzed [3 + 2 + 1] Carbocyclization of Silylalkynes and Enones with Carbon Monoxide	140

3.3.4	Nickel-Catalyzed [4 + 2 + 1] Carbocyclization of Dienynes with Diazomethane .....	141
3.3.5	Rhodium-Catalyzed [5 + 2 + 1] Carbocyclization of Vinylcyclopropanes and Alkynes with Carbon Monoxide .....	142
3.3.6	Palladium-Catalyzed [4 + 4 + 1] Carbocyclization of Two Vinylallenes with Carbon Monoxide .....	143
<b>3.4</b>	<b>[m + n + 2]-Carbocyclization Reactions</b> C. Aubert, M. Malacria, and C. Ollivier	
<b>3.4</b>	<b>[m + n + 2]-Carbocyclization Reactions</b> .....	145
3.4.1	[2 + 2 + 2]-Carbocyclization Reactions .....	145
3.4.1.1	Ruthenium(II)-Mediated [2 + 2 + 2] Carbocyclizations .....	145
3.4.1.1.1	Control of Diastereoselectivity .....	146
3.4.1.1.1.1	Intramolecular Carbocyclization of Dienynes .....	146
3.4.1.2	Cobalt(I)-Mediated [2 + 2 + 2] Carbocyclizations .....	147
3.4.1.2.1	Control of Diastereoselectivity .....	147
3.4.1.2.1.1	Cocyclization of Alkynylboronates and Alkenes .....	147
3.4.1.2.1.2	Cocyclization of Diynes and Alkenes .....	150
3.4.1.2.1.3	Cocyclization of Yne-Heterocycles with Alkynes .....	152
3.4.1.2.1.4	Intramolecular Carbocyclization of Ene-diyne .....	156
3.4.1.2.1.5	Intramolecular Carbocyclization of Diynals and Diynones .....	161
3.4.1.2.1.6	Intramolecular Carbocyclization of Allenediynes .....	162
3.4.1.2.1.7	Intramolecular Cyclotrimerization of Chiral Triynes .....	163
3.4.1.2.2	Control of Central Chirality .....	165
3.4.1.2.2.1	Intramolecular Cyclotrimerization of Allenediynes .....	165
3.4.1.2.3	Control of Axial Chirality .....	165
3.4.1.2.3.1	Carbocyclization of Acetylene and Aryl-Substituted Monoynes Bearing Phosphoryl Moieties .....	165
3.4.1.2.3.2	Carbocyclization of 1,7-Diynes with Nitriles .....	167
3.4.1.3	Rhodium(I)-Mediated [2 + 2 + 2] Carbocyclizations .....	168
3.4.1.3.1	Control of Central Chirality .....	169
3.4.1.3.1.1	Carbocyclization of Tertiary Propargylic Alcohols, Bispropargylic Alcohols, and Dialkynylphosphine Oxides with 1,6-Diyne Esters .....	169
3.4.1.3.1.2	Carbocyclization of 1,6-Diynes with Substituted Alkenes .....	172
3.4.1.3.1.3	Carbocyclization of 1,6-Diynes with Electron-Deficient Ketones .....	175
3.4.1.3.1.4	Carbocyclization of 1,6-Enynes and Alkynes .....	175
3.4.1.3.1.5	Carbocyclization of 1,6-Enynes with Electron-Deficient Ketones .....	177

3.4.1.3.1.6	Cocyclization of Alkenyl Isocyanates and Terminal Alkynes	179
3.4.1.3.1.7	Cocyclization of Alkenyl Carbodiimides and Terminal Alkynes	181
3.4.1.3.1.8	Intramolecular Carbocyclization of Ene-diyne	183
3.4.1.3.1.9	Intramolecular Carbocyclization of Dienynes	184
3.4.1.3.1.10	Intramolecular Carbocyclization of 1, <i>n</i> -Dienynes ( <i>n</i> = 4–6)	185
3.4.1.3.2	Control of Helical Chirality	188
3.4.1.3.2.1	Cocyclization of Tetraynes with Diynes	188
3.4.1.3.2.2	Intramolecular Carbocyclization of Triynes	189
3.4.1.3.3	Control of Axial Chirality	190
3.4.1.3.3.1	Cyclotrimerization of Internal Alkynes	190
3.4.1.3.3.2	Cocyclization of 1,6-Diynes and Alkynes	191
3.4.1.3.3.3	Double Cocyclization of 1,6-Diynes with 1,3-Diynes	194
3.4.1.3.3.4	Cocarbocyclization of 1,6-Diynes with Ynamides	195
3.4.1.3.3.5	Cocarbocyclization of 1,6-Diynes with <i>trans</i> -Alkenes	198
3.4.1.3.3.6	Cocarbocyclization of 1,6-Diynes with Isocyanates	199
3.4.1.3.3.7	Cocyclization of 1,7-Diynes and Internal Alkynes	200
3.4.1.3.3.8	Intramolecular Cyclotrimerization of Ene-diyne and Dienyne	201
3.4.1.2.3.9	Intramolecular Cyclotrimerization of Bis(diyne)malononitriles	203
3.4.1.3.4	Control of Planar Chirality	203
3.4.1.3.4.1	Cocyclization of Internal Diynes and Di- <i>tert</i> -butyl Acetylenedicarboxylate	203
3.4.1.3.4.2	Intramolecular Cyclotrimerization of Triynes	205
3.4.1.4	Iridium(I)-Mediated [2 + 2 + 2] Carbocyclizations	206
3.4.1.4.1	Control of Axial Chirality	206
3.4.1.4.1.1	Cocyclization of 1, <i>n</i> -Diynes and Internal Alkynes	206
3.4.1.4.1.2	Intramolecular Cyclotrimerization of Triynes and Hexaynes	209
3.4.1.5	Nickel(0)-Mediated [2 + 2 + 2] Carbocyclizations	211
3.4.1.5.1	Control of Diastereoselectivity	211
3.4.1.5.1.1	Cocyclization between 1,6-Diynes and Activated Alkenes	211
3.4.1.5.1.2	Cocyclization between Norbornadiene and Activated Alkenes	212
3.4.1.5.2	Control of Central Chirality	213
3.4.1.5.2.1	Intermolecular Cyclotrimerization between Two Alkynes and an Alkene	213
3.4.1.5.2.2	Bimolecular Cocyclization of Diynes and Acetylene	214
3.4.1.5.3	Control of Helical Chirality	215
3.4.1.5.3.1	Cycloisomerization of Triynes	215
3.4.1.6	Palladium(0)-Mediated [2 + 2 + 2] Carbocyclizations	216
3.4.1.6.1	Control of Helical Chirality	216

3.4.1.6.1.1	Carbocyclization of Arynes with Alkynes	216
3.4.2	[3 + 2 + 2]-Carbocyclization Reactions	217
3.4.2.1	Ruthenium(II)-Mediated [3 + 2 + 2]-Carbocyclization Reactions	219
3.4.2.1.1	Cocyclizations between an $\eta^3$ -Allylruthenium(II) Complex and Alkynes	219
3.4.2.2	Cobalt(III)-Mediated [3 + 2 + 2]-Carbocyclization Reactions	221
3.4.2.2.1	Cocyclizations between $\eta^3$ -Allyl-Type Cobalt Complexes and Alkynes	221
3.4.2.3	Rhodium(I)-Mediated [3 + 2 + 2]-Carbocyclization Reactions	224
3.4.2.3.1	Cocyclizations between Alk-6-enylidenecyclopropanes and Activated Alkynes	224
3.4.2.4	Iridium(III)-Mediated [3 + 2 + 2]-Carbocyclization Reactions	225
3.4.2.4.1	Cocyclizations between $\eta^3$ -Allyliridium Complexes and Alkynes	225
3.4.2.5	Nickel(0)-Mediated [3 + 2 + 2]-Carbocyclization Reactions	226
3.4.2.5.1	Cocyclization of Ethyl Cyclopropylideneacetate and Alkynes or Diynes	226
3.4.2.5.2	Cocyclization of Chromium Fischer Carbene Complexes with Terminal Alkynes	227
3.4.3	[4 + 2 + 2]-Carbocyclization Reactions	228
3.4.3.1	Cobalt-Mediated [4 + 2 + 2]-Carbocyclization Reactions	230
3.4.3.1.1	Cocyclization of Norbornadiene with 2-Substituted Buta-1,3-dienes	230
3.4.3.2	Rhodium(I)-Mediated [4 + 2 + 2]-Carbocyclization Reactions	232
3.4.3.2.1	Cocyclization of Enynes with Buta-1,3-dienes	232
3.4.3.2.2	Cocyclization of Dienynes with Alkynes	234
3.4.3.2.3	Cocyclization of Enedienes with Alkynes	236
3.4.3.2.4	Cocyclization of Dienyl Isocyanates with Alkynes	237
<b>3.5</b>	<b>Asymmetric Cycloisomerizations</b> I. D. G. Watson and F. D. Toste	
<b>3.5</b>	<b>Asymmetric Cycloisomerizations</b>	243
3.5.1	Enyne Cycloisomerization	243
3.5.1.1	Palladium-Catalyzed Cycloisomerization	244
3.5.1.2	Rhodium-Catalyzed Cycloisomerization	257
3.5.1.3	Gold- and Platinum-Catalyzed Cycloisomerization	267
3.5.2	Diene Cycloisomerization	277
3.5.2.1	Cycloisomerization of 1,6- and 1,7-Dienes	277
3.5.2.2	Cycloisomerization of 1,6- and 1,7-Allenenes	282
3.5.3	Carbonyl-Ene Reaction	285
3.5.4	Conia-Ene Reaction	288
3.5.5	Intramolecular Cyclization Initiated by C—H Activation	292

<b>3.6</b>	<b>Ene Reactions</b> M. Terada	
<b>3.6</b>	<b>Ene Reactions</b> .....	309
<b>3.6.1</b>	Intramolecular Ene Reactions .....	309
<b>3.6.1.1</b>	Aldehydes and Ketones as Enophiles (Carbonyl-Ene Reactions) .....	310
<b>3.6.1.1.1</b>	Type-I Cyclizations .....	310
<b>3.6.1.1.1.1</b>	Diastereoselective Reactions .....	310
<b>3.6.1.1.1.2</b>	Enantioselective Reaction of Aldehydes .....	311
<b>3.6.1.1.1.3</b>	Enantioselective Reaction of Ketones .....	312
<b>3.6.1.1.2</b>	Type-II Cyclizations .....	314
<b>3.6.1.1.2.1</b>	Diastereoselective Reactions .....	314
<b>3.6.1.1.2.2</b>	Enantioselective Reactions .....	315
<b>3.6.1.2</b>	Alkynes as Enophiles .....	316
<b>3.6.1.2.1</b>	Type-I Cyclizations .....	316
<b>3.6.1.2.1.1</b>	Enantioselective Reaction of 1,6-Enynes .....	316
<b>3.6.1.2.1.2</b>	Enantioselective Reaction of 1,7-Enynes .....	318
<b>3.6.1.2.2</b>	Conia-Ene Reactions .....	319
<b>3.6.1.2.2.1</b>	Enantioselective Reactions .....	319
<b>3.6.2</b>	Intermolecular Ene Reactions .....	320
<b>3.6.2.1</b>	Aldehydes and Ketones as Enophiles (Carbonyl-Ene Reactions) .....	321
<b>3.6.2.1.1</b>	Enantioselective Reaction of Aldehydes .....	321
<b>3.6.2.1.1.1</b>	Unactivated Alkenes as Ene Components .....	321
<b>3.6.2.1.1.2</b>	Enol Ethers as Ene Components .....	326
<b>3.6.2.1.1.3</b>	Enamides or Enecarbamates as Ene Components .....	328
<b>3.6.2.1.2</b>	Enantioselective Reaction of Ketones .....	330
<b>3.6.2.1.2.1</b>	Unactivated Alkenes as Ene Components .....	330
<b>3.6.2.1.2.2</b>	Activated Alkenes as Ene Components .....	332
<b>3.6.2.2</b>	Imines as Enophiles (Imino-Ene Reactions) .....	333
<b>3.6.2.2.1</b>	Enantioselective Reactions .....	333
<b>3.6.2.2.1.1</b>	Unactivated Alkenes as Ene Components .....	333
<b>3.6.2.2.1.2</b>	Enecarbamates as Ene Components .....	335
<b>3.6.2.3</b>	Electron-Deficient Alkenes as Enophiles .....	338
<b>3.6.2.3.1</b>	Enantioselective Reactions .....	338
<b>3.6.2.3.1.1</b>	Unactivated Alkenes as Ene Components .....	338
<b>3.6.2.3.1.2</b>	Enecarbamates as Ene Components .....	339
<b>3.6.2.4</b>	Heteroatom—Heteroatom Double Bonds as Enophiles .....	341

3.6.2.4.1	Enantioselective Reaction of Azodicarboxylates .....	341
3.6.2.4.1.1	Unactivated Alkenes as Ene Components .....	341
3.6.2.4.1.2	Enecarbamates as Ene Components .....	342
<b>3.7</b>	<b>Sigmatropic Rearrangements</b> J. Zeh and M. Hiersemann	
<hr/>		
<b>3.7</b>	<b>Sigmatropic Rearrangements</b> .....	347
<b>3.7.1</b>	The Claisen Rearrangement .....	347
<b>3.7.1.1</b>	The Classic Claisen Rearrangement .....	353
<b>3.7.1.2</b>	The 3-Aza-Claisen Rearrangement .....	355
<b>3.7.1.3</b>	The Thio-Claisen Rearrangement .....	356
<b>3.7.1.4</b>	The Claisen Rearrangement of Chelated Enolates .....	357
