

**Volume 45b:  
Aromatic Ring Assemblies, Polycyclic Aromatic  
Hydrocarbons, and Conjugated Polyenes**

	<b>Preface</b> .....	V
	<b>Table of Contents</b> .....	IX
45.13	<b>Product Class 13: Biaryls</b> D. A. Black and K. Fagnou .....	547
45.14	<b>Product Class 14: Arylalkanes</b> D. A. Black and K. Fagnou .....	627
45.15	<b>Product Class 15: Poly(phenylenes)</b> M. Abe and T. Yamamoto .....	653
45.16	<b>Product Class 16: Poly(<i>p</i>-phenylenevinylens)</b> L. Pu .....	677
45.17	<b>Product Class 17: Poly(xylylenes)</b> T. Itoh .....	697
45.18	<b>Product Class 18: Polystyrenes</b> F. Aldabbagh and O. Gibbons .....	723
45.19	<b>Product Class 19: Naphthalenes, Anthracenes, 9<i>H</i>-Fluorenes, and Other Acenes</b> S. Toyota and T. Iwanaga .....	745
45.20	<b>Product Class 20: Cyclobutabenzenes, Biphenylenes, and [N]Phenylenes</b> S. Toyota .....	855
45.21	<b>Product Class 21: Phenanthrenes, Helicenes, and Other Angular Acenes</b> I. G. Stará and I. Starý .....	885
45.22	<b>Product Class 22: Pyrenes, Circulenes, and Other Condensed Acenes</b> C.-S. Chang and Y.-T. Wu .....	955
45.23	<b>Product Class 23: Annulated Polycyclic Aromatic Hydrocarbons</b> W.-C. Lin and Y.-T. Wu .....	1017
45.24	<b>Product Class 24: Pentalenes, <i>s</i>-Indacenes, <i>as</i>-Indacenes, Azulenes, and Heptalenes, and Their Benzo Derivatives</b> K. Abou-Hadeed and H.-J. Hansen .....	1043

---

45.25	<b>Product Class 25: Extended Polyaromatic Hydrocarbons: Graphite, Fullerene, and Carbon Nanotube Substructures</b> I. G. Stará and I. Starý .....	1115
45.26	<b>Product Class 26: Triphenylenes, Tetraphenylenes, and Related Compounds</b> S. R. Waldvogel and N. Welschoff .....	1147
45.27	<b>Product Class 27: Calixarenes</b> T. Haino and H. Iwamoto .....	1193
45.28	<b>Product Class 28: Mononuclear Cyclophanes</b> T. Shinmyozu and M. Shibahara .....	1267
45.29	<b>Product Class 29: Polynuclear Cyclophanes</b> Y. Tobe and T. Takeda .....	1311
45.30	<b>Product Class 30: Conjugated Polyenes, Including Cyclic Polyenes That Are Not Fully Conjugated</b> S. Koo .....	1349
45.31	<b>Product Class 31: Macromolecular Conjugated Polyenes</b> T. Masuda, M. Shiotsuki, and F. Sanda .....	1421
	<b>Keyword Index</b> .....	1441
	<b>Author Index</b> .....	1497
	<b>Abbreviations</b> .....	1535

## Table of Contents

45.13	<b>Product Class 13: Biaryls</b> D. A. Black and K. Fagnou	
<hr/>		
45.13	<b>Product Class 13: Biaryls</b> .....	547
45.13.1	Synthesis of Product Class 13 .....	547
45.13.1.1	Synthesis Using Copper Catalysis .....	547
45.13.1.1.1	Method 1: The Ullmann Reaction .....	547
45.13.1.1.2	Method 2: Cross-Coupling Reactions .....	549
45.13.1.1.2.1	Variation 1: Using Boronic Acids .....	549
45.13.1.1.2.2	Variation 2: Using Organotin Reagents .....	550
45.13.1.2	The Suzuki Cross-Coupling Reaction .....	551
45.13.1.2.1	Method 1: Aryl Iodides in Suzuki Cross-Coupling Reactions .....	552
45.13.1.2.2	Method 2: Aryl Bromides in Suzuki Cross-Coupling Reactions .....	555
45.13.1.2.3	Method 3: Aryl Chlorides in Suzuki Cross-Coupling Reactions .....	562
45.13.1.2.4	Method 4: Aryl 4-Toluenesulfonates and Trifluoromethanesulfonates in Suzuki Cross-Coupling Reactions .....	567
45.13.1.2.5	Method 5: Diazonium Salts in Suzuki Cross-Coupling Reactions .....	571
45.13.1.2.6	Method 6: Synthesis of Hindered Biaryls Using the Suzuki Cross-Coupling Reaction .....	572
45.13.1.2.7	Method 7: Synthesis of Oligoaromatics Using the Suzuki Cross-Coupling Reaction .....	575
45.13.1.3	The Stille Cross-Coupling Reaction .....	577
45.13.1.3.1	Method 1: Aryl Iodides in Stille Cross-Coupling Reactions .....	578
45.13.1.3.2	Method 2: Aryl Bromides in Stille Cross-Coupling Reactions .....	579
45.13.1.3.3	Method 3: Aryl Chlorides in Stille Cross-Coupling Reactions .....	580
45.13.1.3.4	Method 4: Aryl Trifluoromethanesulfonates in Stille Cross-Coupling Reactions .....	581
45.13.1.3.5	Method 5: Synthesis of Hindered Biaryls Using the Stille Cross-Coupling Reaction .....	582
45.13.1.4	The Negishi Cross-Coupling Reaction .....	584
45.13.1.4.1	Method 1: Aryl Iodides in Negishi Cross-Coupling Reactions .....	584
45.13.1.4.2	Method 2: Aryl Bromides in Negishi Cross-Coupling Reactions .....	586
45.13.1.4.3	Method 3: Aryl Chlorides in Negishi Cross-Coupling Reactions .....	587
45.13.1.4.4	Method 4: Aryl Trifluoromethanesulfonates in Negishi Cross-Coupling Reactions .....	588
45.13.1.4.5	Method 5: Synthesis of Hindered Biaryls Using the Negishi Cross-Coupling Reaction .....	589
45.13.1.5	The Hiyama Cross-Coupling Reaction .....	591
45.13.1.5.1	Method 1: Aryl Iodides in Hiyama Cross-Coupling Reactions .....	591
45.13.1.5.2	Method 2: Aryl Bromides in Hiyama Cross-Coupling Reactions .....	594

45.13.1.5.3	Method 3:	Aryl Chlorides in Hiyama Cross-Coupling Reactions	596
45.13.1.5.4	Method 4:	Aryl Trifluoromethanesulfonates in Hiyama Cross-Coupling Reactions	598
45.13.1.5.5	Method 5:	Synthesis of Oligoaromatics Using the Hiyama Cross-Coupling Reaction	599
45.13.1.6		The Kumada–Corriu Cross-Coupling Reaction	599
45.13.1.6.1	Method 1:	Aryl Iodides in Kumada–Corriu Cross-Coupling Reactions	599
45.13.1.6.2	Method 2:	Aryl Bromides in Kumada–Corriu Cross-Coupling Reactions	601
45.13.1.6.3	Method 3:	Aryl Chlorides in Kumada–Corriu Cross-Coupling Reactions	602
45.13.1.6.4	Method 4:	Aryl Trifluoromethanesulfonates and Arenesulfonates in Kumada–Corriu Cross-Coupling Reactions	603
45.13.1.6.5	Method 5:	Synthesis of Hindered Biaryls Using the Kumada–Corriu Cross-Coupling Reaction	605
45.13.1.6.6	Method 6:	Synthesis of Oligoaromatics Using the Kumada–Corriu Coupling Reaction	605
45.13.1.7		Direct Arylation	606
45.13.1.7.1	Method 1:	Intramolecular Direct Arylation	606
45.13.1.7.2	Method 2:	Intermolecular Direct Arylation	612
45.13.1.7.2.1	Variation 1:	In the Presence of Directing Groups	612
45.13.1.7.2.2	Variation 2:	Without Directing Groups	617
45.13.1.7.3	Method 3:	Palladium-Catalyzed Domino/Cascade Reactions Involving Direct Arylation	618
45.14		<b>Product Class 14: Arylalkanes</b> D. A. Black and K. Fagnou	
45.14		<b>Product Class 14: Arylalkanes</b>	627
45.14.1		Synthesis of Product Class 14	627
45.14.1.1	Method 1:	Friedel–Crafts Alkylation	627
45.14.1.1.1	Variation 1:	Using Alkyl Halides	627
45.14.1.1.2	Variation 2:	Using Alkenes	629
45.14.1.1.3	Variation 3:	Using Alcohols	632
45.14.1.1.4	Variation 4:	Using Esters	633
45.14.1.1.5	Variation 5:	Asymmetric Friedel–Crafts Alkylation	634
45.14.1.2	Method 2:	Alkylation of Aromatic Ketones with Alkenes by C–H Activation	636
45.14.1.3	Method 3:	Alkylation via Transition-Metal-Catalyzed Cross-Coupling Reactions with Alkyl Electrophiles	636
45.14.1.3.1	Variation 1:	Kumada Cross-Coupling Reaction	636
45.14.1.3.2	Variation 2:	Suzuki Cross-Coupling Reaction	638
45.14.1.3.3	Variation 3:	Negishi Cross-Coupling Reaction	639
45.14.1.3.4	Variation 4:	Stille Cross-Coupling Reaction	641
45.14.1.3.5	Variation 5:	Hiyama Cross-Coupling Reaction	641
45.14.1.4	Method 4:	Alkylation via Transition-Metal-Catalyzed Cross-Coupling Reactions with Alkyl Nucleophiles	643

45.14.1.4.1	Variation 1: Kumada Cross-Coupling Reaction	643
45.14.1.4.2	Variation 2: Suzuki Cross-Coupling Reaction	644
45.14.1.4.3	Variation 3: Negishi Cross-Coupling Reaction	647
45.14.1.4.4	Variation 4: Hiyama Cross-Coupling Reaction	649
45.15	<b>Product Class 15: Poly(phenylenes)</b> M. Abe and T. Yamamoto	
45.15	<b>Product Class 15: Poly(phenylenes)</b>	653
45.15.1	<b>Product Subclass 1: Linear Poly(phenylenes)</b>	653
45.15.1.1	Synthesis of Product Subclass 1	654
45.15.1.1.1	Method 1: Kovacic Procedure	654
45.15.1.1.2	Method 2: Dehalogenative Polycondensation Reactions of Disubstituted Benzenes Using Nickel(0) Complexes	655
45.15.1.1.2.1	Variation 1: Using Bis( $\eta^4$ -cycloocta-1,5-diene)nickel(0)	656
45.15.1.1.2.2	Variation 2: Using a Nickel Complex as the Catalyst and Zinc as the Reducing Reagent	658
45.15.1.1.3	Method 3: Grignard Coupling Reactions	659
45.15.1.1.4	Method 4: Suzuki Coupling Reactions	661
45.15.1.1.4.1	Variation 1: AB-Type Approach	661
45.15.1.1.4.2	Variation 2: AA/BB-Type Approach	663
45.15.1.1.5	Method 5: Stille Coupling Reactions	664
45.15.1.1.6	Method 6: Reactions Utilizing Intermediate Polymers	666
45.15.1.1.6.1	Variation 1: Aromatization by Decarboxylation of Soluble Precursor Polymers	666
45.15.1.1.6.2	Variation 2: Decarboxylation of a Precursor with a Poly( <i>p</i> -phenylene) Backbone	668
45.15.1.1.7	Method 7: Diels–Alder Polycondensations	668
45.15.2	<b>Product Subclass 2: Macrocyclic Poly(phenylenes)</b>	670
45.15.2.1	Synthesis of Product Subclass 2	670
45.15.2.1.1	Method 1: Reductive Coupling Reactions	670
45.15.2.1.2	Method 2: Suzuki Coupling Reactions	671
45.15.3	<b>Product Subclass 3: Dendritic Poly(phenylenes)</b>	672
45.15.3.1	Synthesis of Product Subclass 3	672
45.15.3.1.1	Method 1: Suzuki Coupling Reactions	672
45.15.3.1.2	Method 2: Diels–Alder Cycloaddition Reactions	673
45.16	<b>Product Class 16: Poly(<i>p</i>-phenylenevinylenes)</b> L. Pu	
45.16	<b>Product Class 16: Poly(<i>p</i>-phenylenevinylenes)</b>	677
45.16.1	<b>Product Subclass 1: Unsubstituted Poly(<i>p</i>-phenylenevinylenes)</b>	677
45.16.1.1	Synthesis of Product Subclass 1	677

45.16.1.1.1	Method 1:	Polymerization of Sulfonium Salts	678
45.16.1.1.2	Method 2:	Polymerization of Dithiocarbonates	679
45.16.1.1.3	Method 3:	Polymerization of Dithiocarbamates	679
45.16.1.1.4	Method 4:	Polymerization of Sulfinyl Compounds	680
45.16.1.1.5	Method 5:	Ring-Opening Metathesis Polymerization	681
45.16.2	<b>Product Subclass 2: Substituted, Soluble Poly(<i>p</i>-phenylenevinylenes)</b>		682
45.16.2.1	Synthesis of Product Subclass 2		682
45.16.2.1.1	Method 1:	Polymerization of Sulfonium Salts	683
45.16.2.1.2	Method 2:	The Gilch Method	683
45.16.2.1.3	Method 3:	Polymerization of Dithiocarbamates	685
45.16.2.1.4	Method 4:	Wittig Reactions	686
45.16.2.1.5	Method 5:	Horner Reactions	687
45.16.2.1.6	Method 6:	Heck Coupling	688
45.16.2.1.7	Method 7:	Stille Coupling	689
45.16.2.1.8	Method 8:	Acyclic Diene Metathesis Polymerization	689
45.16.2.1.9	Method 9:	Ring-Opening Metathesis Polymerization	690
45.16.2.1.10	Method 10:	Polymerization of (Dichloromethyl)aryls	691
45.16.2.1.11	Method 11:	McMurry Reaction	692
45.16.2.1.12	Method 12:	Knoevenagel Condensation	692
45.17	<b>Product Class 17: Poly(xylylenes)</b>		
	T. Itoh		
45.17	<b>Product Class 17: Poly(xylylenes)</b>		697
45.17.1	<b>Product Subclass 1: Poly(<i>p</i>-xylylenes)</b>		698
45.17.1.1	Synthesis of Product Subclass 1		698
45.17.1.1.1	Method 1:	Wurtz–Fittig Dehalogenation of 1,4-Bis(halomethyl)arenes in the Presence of a Metal	698
45.17.1.1.2	Method 2:	Friedel–Crafts Coupling of Benzene with 1,2-Dihaloethanes, or of (2-Haloethyl)benzenes	698
45.17.1.1.3	Method 3:	Synthesis by Isomerization Polymerization of Diazo Compounds	699
45.17.1.1.4	Method 4:	Reductive Coupling of Aromatic Dialdehydes	699
45.17.1.1.5	Method 5:	Polyrecombination in the Presence of Peroxide	700
45.17.1.1.6	Method 6:	Hofmann and Hofmann-Analogous Degradations	700
45.17.1.1.6.1	Variation 1:	Of Trimethyl(4-methylbenzyl)ammonium Salts	700
45.17.1.1.6.2	Variation 2:	Of Trimethyl[4-(trimethylsilylmethyl)benzyl]ammonium Halides	701
45.17.1.1.7	Method 7:	Electrochemical Reduction of 1,4-Bis(halomethyl)benzenes	702
45.17.1.1.8	Method 8:	Dehydrohalogenation with Base	704
45.17.1.1.8.1	Variation 1:	Of 1-(Halomethyl)-4-methylarenes	704
45.17.1.1.8.2	Variation 2:	Of 1,4-Bis(halomethyl)arenes	705
45.17.1.1.8.3	Variation 3:	Of <i>p</i> -Xylylenebis(dialkylsulfonium) Dihalide Salts	707
45.17.1.1.8.4	Variation 4:	Of 4-(Chloromethyl)benzyl Sulfoxides or Sulfones	708
45.17.1.1.9	Method 9:	Chemical Vapor Deposition by Pyrolysis	709

45.17.1.1.9.1	Variation 1:	Of <i>p</i> -Xylenes	709
45.17.1.1.9.2	Variation 2:	Of Esters of 1,4-Phenylenedimethanols	710
45.17.1.1.9.3	Variation 3:	Of 1-(Halomethyl)- or 1-(Dihalomethyl)-4-methylbenzenes, or 1,4-Bis(dihalomethyl)benzenes	711
45.17.1.1.9.4	Variation 4:	Of Cyclophanes	712
45.17.1.1.9.5	Variation 5:	Of a Spiro Compound	714
45.17.1.1.10	Method 10:	Dehalogenation of 1,4-Bis(trihalomethyl)benzenes via Chemical Vapor Deposition by Pyrolysis with Metal Contact	714
45.17.2	<b>Product Subclass 2: Poly(<i>m</i>-xylylenes)</b>		715
45.17.2.1	Synthesis of Product Subclass 2		715
45.17.2.1.1	Method 1:	Wurtz–Fittig Dehalogenation of 1,3-Bis(halomethyl)benzenes in the Presence of a Metal	715
45.17.2.1.2	Method 2:	Reductive Coupling of Aromatic Dialdehydes	716
45.17.3	<b>Product Subclass 3: Poly(<i>o</i>-xylylenes)</b>		716
45.17.3.1	Synthesis of Product Subclass 3		716
45.17.3.1.1	Method 1:	Wurtz–Fittig Dehalogenation of a 1,2-Bis(halomethyl)benzene in the Presence of a Metal	716
45.17.3.1.2	Method 2:	Electrochemical Reduction of 1,2-Bis(halomethyl)benzenes	717
45.17.3.1.3	Method 3:	Ring-Opening Reactions	717
45.17.3.1.3.1	Variation 1:	Of Spiro Compounds	717
45.17.3.1.3.2	Variation 2:	Of Benzocyclobutenes	718
45.18	<b>Product Class 18: Polystyrenes</b> F. Aldabbagh and O. Gibbons		
45.18	<b>Product Class 18: Polystyrenes</b>		723
45.18.1	<b>Product Subclass 1: Linear Polystyrenes</b>		723
45.18.1.1	Synthesis of Product Subclass 1		723
45.18.1.1.1	Method 1:	Conventional Radical Polymerization	724
45.18.1.1.1.1	Variation 1:	Addition–Fragmentation Chain Transfer (AFCT)	725
45.18.1.1.2	Method 2:	Controlled/Living Radical Polymerization (CLRP)	726
45.18.1.1.2.1	Variation 1:	Nitroxide-Mediated Radical Polymerization (NMP)	727
45.18.1.1.2.2	Variation 2:	Atom Transfer Radical Polymerization (ATRP)	728
45.18.1.1.2.3	Variation 3:	Reversible Addition–Fragmentation Chain Transfer (RAFT)	729
45.18.1.1.2.4	Variation 4:	Organotellurium-Mediated Living Radical Polymerization (TERP)	730
45.18.1.1.3	Method 3:	Living Anionic Polymerization	730
45.18.1.1.4	Method 4:	Living Cationic Polymerization	731
45.18.1.1.5	Method 5:	Coordination Polymerization	732
45.18.1.1.5.1	Variation 1:	Isotactic Polymerization	733
45.18.1.1.5.2	Variation 2:	Syndiotactic Polymerization	733
45.18.1.1.6	Method 6:	Modification of Substituents	734
45.18.1.1.6.1	Variation 1:	Click Chemistry Approach	734
45.18.1.1.6.2	Variation 2:	Miscellaneous Organic Functional Group Transformations	735

45.18.1.2	Applications of Product Subclass 1 in Organic Synthesis	736
45.18.1.2.1	Method 1: Soluble Polystyrene Supports Made by Controlled/Living Radical Polymerization	737
45.18.2	<b>Product Subclass 2: Branched Polystyrenes</b>	737
45.18.2.1	Synthesis of Product Subclass 2	737
45.18.2.1.1	Method 1: Alkoxyamine-Initiated Radical Polymerization	738
45.18.2.1.2	Method 2: Controlled/Living Radical Copolymerization with Macromonomers	739
45.18.3	<b>Product Subclass 3: Cross-Linked Polystyrenes</b>	739
45.18.3.1	Synthesis of Product Subclass 3	740
45.18.3.1.1	Method 1: Suspension Copolymerization of Styrene with Cross-Linking Monomers	740
45.19	<b>Product Class 19: Naphthalenes, Anthracenes, 9H-Fluorenes, and Other Acenes</b> S. Toyota and T. Iwanaga	
45.19	<b>Product Class 19: Naphthalenes, Anthracenes, 9H-Fluorenes, and Other Acenes</b>	745
45.19.1	<b>Product Subclass 1: Naphthalenes</b>	746
45.19.1.1	Synthesis of Product Subclass 1	746
45.19.1.1.1	Synthesis by Ring-Closure Reactions	746
45.19.1.1.1.1	Method 1: Formation of Three C—C Bonds	747
45.19.1.1.1.1.1	Variation 1: Palladium-Catalyzed Cyclization of Alkynes and Alkenes	747
45.19.1.1.1.1.2	Variation 2: Palladium-Catalyzed Cyclization of Alkynes	747
45.19.1.1.1.1.3	Variation 3: Iridium-Catalyzed Cyclization	748
45.19.1.1.1.1.4	Variation 4: Copper-Catalyzed Cyclization of Organozirconium Compounds	748
45.19.1.1.1.1.5	Variation 5: Insertion of a Nickel–Benzyne Complex	749
45.19.1.1.1.2	Method 2: Formation of Two C—C Bonds with a C <sub>2</sub> Unit	750
45.19.1.1.1.2.1	Variation 1: Titanium-Catalyzed Cyclization	750
45.19.1.1.1.2.2	Variation 2: Palladium-Catalyzed Cyclization of Organozirconium Compounds	750
45.19.1.1.1.2.3	Variation 3: Palladium-Catalyzed Cyclization of Vinyl and Aryl Iodides	751
45.19.1.1.1.2.4	Variation 4: Diels–Alder Reaction of <i>o</i> -Quinodimethanes	752
45.19.1.1.1.2.5	Variation 5: Diels–Alder Reaction of Organotungsten Compounds	753
45.19.1.1.1.2.6	Variation 6: Electrophilic Cyclization	753
45.19.1.1.1.2.7	Variation 7: Lewis Acid Catalyzed Cyclization	754
45.19.1.1.1.2.8	Variation 8: Cyclization of Phosphonium Salts with Enolates	755
45.19.1.1.1.3	Method 3: Formation of Two C—C Bonds with a C <sub>3</sub> Unit	756
45.19.1.1.1.3.1	Variation 1: Cyclization with Enones	756
45.19.1.1.1.3.2	Variation 2: Cyclization with 3-Oxo Acetals	757
45.19.1.1.1.3.3	Variation 3: Cyclization with 3-Oxo Dithioacetals	757

45.19.1.1.1.3.4	Variation 4:	Cyclization with Grignard Reagents	758
45.19.1.1.1.4	Method 4:	Formation of Two C—C Bonds with a C <sub>4</sub> Unit	759
45.19.1.1.1.4.1	Variation 1:	Diels–Alder Reaction with Cyclopentadienones	760
45.19.1.1.1.4.2	Variation 2:	Diels–Alder Reaction with Pyrroles	760
45.19.1.1.1.4.3	Variation 3:	Diels–Alder Reaction with Furans	761
45.19.1.1.1.5	Method 5:	Formation of One C—C Bond to a Benzene Ring	763
45.19.1.1.1.5.1	Variation 1:	Friedel–Crafts Acylation	764
45.19.1.1.1.5.2	Variation 2:	Friedel–Crafts Alkylation	764
45.19.1.1.1.5.3	Variation 3:	Lewis Acid Catalyzed Rearrangement of Vinylidenecyclopropanes	765
45.19.1.1.1.5.4	Variation 4:	Electrophilic Cyclization of Alkynes	766
45.19.1.1.1.5.5	Variation 5:	Base-Catalyzed Cyclization of Enynes	766
45.19.1.1.1.5.6	Variation 6:	Base-Catalyzed Rearrangement of Methylene-tetrahydrofurans	767
45.19.1.1.1.6	Method 6:	Formation of One C—C Bond at Other Sites	768
45.19.1.1.1.6.1	Variation 1:	Bergman Cyclization	768
45.19.1.1.1.6.2	Variation 2:	Tellurium-Mediated Cycloaddition	769
45.19.1.1.1.6.3	Variation 3:	Reductive Cyclization	769
45.19.1.1.1.6.4	Variation 4:	Ring-Closing Metathesis	770
45.19.1.1.1.6.5	Variation 5:	Metal-Catalyzed Cyclization	770
45.19.1.1.2		Synthesis by Ring Transformation	771
45.19.1.1.2.1	Method 1:	Valence Isomerism	771
45.19.1.1.2.1.1	Variation 1:	From Dewar Benzenes	771
45.19.1.1.2.1.2	Variation 2:	From Benzvalenes	772
45.19.1.1.2.2	Method 2:	Rearrangement Reactions	772
45.19.1.1.2.2.1	Variation 1:	Metal-Mediated Ring Expansion	772
45.19.1.1.2.2.2	Variation 2:	Thermal Ring Expansion	773
45.19.1.1.2.2.3	Variation 3:	Acid-Catalyzed Ring Contraction	773
45.19.1.1.3		Synthesis by Aromatization	774
45.19.1.1.3.1	Method 1:	Oxidation of Hydrogenated Compounds	774
45.19.1.1.3.1.1	Variation 1:	Dehydrogenation over Palladium on Carbon	774
45.19.1.1.3.1.2	Variation 2:	Dehydrogenation by Sulfur	775
45.19.1.1.3.1.3	Variation 3:	Dehydrogenation by Benzoquinones	776
45.19.1.1.3.1.4	Variation 4:	Other Methods	776
45.19.1.1.3.2	Method 2:	Synthesis from Tetralones or Naphthoquinones	777
45.19.1.1.3.2.1	Variation 1:	Direct Conversion into Naphthalenes	777
45.19.1.1.3.2.2	Variation 2:	Stepwise Conversion into Naphthalenes	778
45.19.1.1.3.3	Method 3:	Elimination Reactions	779
45.19.1.1.3.3.1	Variation 1:	Dehydration	779
45.19.1.1.3.3.2	Variation 2:	Dehydrobromination	780
45.19.1.1.4		Synthesis by Substitution of Existing Substituents	780
45.19.1.1.4.1	Method 1:	Substitution of Hydrogen	780
45.19.1.1.4.1.1	Variation 1:	Friedel–Crafts Alkylation	780
45.19.1.1.4.2	Method 2:	Substitution of Carbon	781
45.19.1.1.4.2.1	Variation 1:	Dealkylation	781
45.19.1.1.4.3	Method 3:	Substitution of Heteroatoms	782

45.19.1.1.4.3.1	Variation 1:	Coupling with Organoboranes	782
45.19.1.1.4.3.2	Variation 2:	Coupling with Grignard Reagents	783
45.19.1.1.4.3.3	Variation 3:	Coupling with Organoaluminum Complexes	784
45.19.1.1.4.3.4	Variation 4:	Coupling with Other Organometallic Reagents	785
45.19.1.1.5		Synthesis by Modification of Substituents	785
45.19.1.1.5.1	Method 1:	Alkylation of Alkyl Substituents	785
45.19.1.1.5.2	Method 2:	Dehalogenation of Halomethyl Groups	786
45.19.1.1.5.3	Method 3:	Deoxygenation of Hydroxymethyl Groups	787
45.19.1.1.5.4	Method 4:	Reduction of Acyl Groups	787
45.19.2		<b>Product Subclass 2: Anthracenes</b>	788
45.19.2.1		Synthesis of Product Subclass 2	788
45.19.2.1.1		Synthesis by Ring-Closure Reactions	788
45.19.2.1.1.1	Method 1:	Formation of the Two Terminal Benzene Rings	788
45.19.2.1.1.1.1	Variation 1:	Palladium-Catalyzed Cyclization	788
45.19.2.1.1.1.2	Variation 2:	Copper-Catalyzed Cyclization with Organozirconium Compounds	789
45.19.2.1.1.1.3	Variation 3:	Diels–Alder Reaction with Furans and Pyrroles	790
45.19.2.1.1.1.4	Variation 4:	Diels–Alder Reaction of Benzo-1,4-quinone	791
45.19.2.1.1.1.5	Variation 5:	Bergman Cyclization	792
45.19.2.1.1.2	Method 2:	Formation of the Central Benzene Ring and a Terminal Benzene Ring	793
45.19.2.1.1.3	Method 3:	Formation of the Central Benzene Ring	794
45.19.2.1.1.3.1	Variation 1:	Acid-Catalyzed Cyclization of Benzyl Acetates	794
45.19.2.1.1.3.2	Variation 2:	Thermal Cyclodehydration	794
45.19.2.1.1.3.3	Variation 3:	Acid-Catalyzed Cyclization of Ketones	795
45.19.2.1.1.3.4	Variation 4:	Acid-Catalyzed Cyclization of Azines	795
45.19.2.1.1.3.5	Variation 5:	Diels–Alder Reaction of Isobenzofuran	796
45.19.2.1.1.3.6	Variation 6:	Diels–Alder Reaction of Isoindoles	797
45.19.2.1.1.4	Method 4:	Synthesis by Formation of a Terminal Benzene Ring	798
45.19.2.1.1.4.1	Variation 1:	Iridium-Catalyzed Cyclization	798
45.19.2.1.1.4.2	Variation 2:	Diels–Alder Reaction of Dienes	798
45.19.2.1.1.4.3	Variation 3:	Bergman Cyclization	799
45.19.2.1.2		Synthesis by Ring Transformation	800
45.19.2.1.2.1	Method 1:	Ring Contraction by Pyrolysis	800
45.19.2.1.3		Synthesis by Aromatization	801
45.19.2.1.3.1	Method 1:	Oxidation of Dihydroanthracenes	801
45.19.2.1.3.1.1	Variation 1:	Dehydrogenation by Conventional Methods	801
45.19.2.1.3.1.2	Variation 2:	Dehydrogenation via an Anion	802
45.19.2.1.3.1.3	Variation 3:	Dehydrogenation by Oxygen	803
45.19.2.1.3.2	Method 2:	Synthesis from Oxygenated Compounds	804
45.19.2.1.3.2.1	Variation 1:	Alkylation of Anthraquinones	804
45.19.2.1.3.2.2	Variation 2:	Alkylation of Anthracen-9(10 <i>H</i> )-ones	805
45.19.2.1.3.2.3	Variation 3:	Reduction of Anthraquinones	806
45.19.2.1.3.2.4	Variation 4:	Reduction of Anthracenones	807

45.19.2.1.3.3	Method 3:	Elimination Reactions	808
45.19.2.1.3.3.1	Variation 1:	Deoxygenation	808
45.19.2.1.3.3.2	Variation 2:	Retro-Diels–Alder Reaction	809
45.19.2.1.4	Synthesis by Substitution of Existing Substituents		809
45.19.2.1.4.1	Method 1:	Substitution of Hydrogen	809
45.19.2.1.4.1.1	Variation 1:	Friedel–Crafts Alkylation	809
45.19.2.1.4.1.2	Variation 2:	Alkylation of 9,10-Dihydroanthracenes	810
45.19.2.1.4.1.3	Variation 3:	Alkylation of 1,4-Dihydroanthracene	812
45.19.2.1.4.2	Method 2:	Substitution of Carbon	812
45.19.2.1.4.2.1	Variation 1:	Dealkylation	812
45.19.2.1.4.3	Method 3:	Substitution of Heteroatoms	813
45.19.2.1.4.3.1	Variation 1:	Nucleophilic Alkylation	813
45.19.2.1.4.3.2	Variation 2:	Alkylation via Organolithium Compounds	814
45.19.2.1.4.3.3	Variation 3:	Cross-Coupling Reactions	815
45.19.2.1.5	Synthesis by Modification of Substituents		816
45.19.2.1.5.1	Method 1:	Reduction of Acyl Groups	816
45.19.3	<b>Product Subclass 3: 9H-Fluorenes</b>		817
45.19.3.1	Synthesis of Product Subclass 3		817
45.19.3.1.1	Synthesis by Ring-Closure Reactions		818
45.19.3.1.1.1	Method 1:	Formation of the Five-Membered Ring by Formation of Two Bonds	818
45.19.3.1.1.1.1	Variation 1:	Palladium-Catalyzed Cyclizations	818
45.19.3.1.1.2	Method 2:	Formation of the Five-Membered Ring by C <sub>9</sub> –C <sub>Ar</sub> Bond Formation	819
45.19.3.1.1.2.1	Variation 1:	Niobium-Catalyzed Cyclizations	819
45.19.3.1.1.2.2	Variation 2:	Thermal Cyclization	819
45.19.3.1.1.2.3	Variation 3:	Electrophilic Cyclization	820
45.19.3.1.1.3	Method 3:	Formation of the Five-Membered Ring by C <sub>Ar</sub> –C <sub>Ar</sub> Bond Formation	820
45.19.3.1.1.3.1	Variation 1:	Metal-Catalyzed Coupling	820
45.19.3.1.1.3.2	Variation 2:	Palladium-Catalyzed Coupling	821
45.19.3.1.1.3.3	Variation 3:	Electrophilic Substitution	821
45.19.3.1.1.4	Method 4:	Formation of a Terminal Benzene Ring	822
45.19.3.1.1.4.1	Variation 1:	Diels–Alder Reaction	822
45.19.3.1.1.4.2	Variation 2:	Cyclization of Indene Derivatives	823
45.19.3.1.2	Synthesis by Reduction of Oxygenated Compounds		824
45.19.3.1.2.1	Method 1:	Reduction of 9H-Fluoren-9-ones	824
45.19.3.1.2.2	Method 2:	Reduction of 9H-Fluoren-9-ols	825
45.19.3.1.2.3	Method 3:	Elimination and Reduction of 9H-Fluoren-9-ols	825
45.19.3.1.3	Synthesis by Substitution of Existing Substituents		826
45.19.3.1.3.1	Method 1:	Substitution of Aromatic Hydrogen	826
45.19.3.1.3.1.1	Variation 1:	Friedel–Crafts Alkylation	826
45.19.3.1.3.1.2	Variation 2:	Transalkylation	827

45.19.3.1.3.2	Method 2:	Substitution of Hydrogen at C9	828
45.19.3.1.3.2.1	Variation 1:	Substitution Using Alkyl Halides	828
45.19.3.1.3.2.2	Variation 2:	Substitution by Sodium Alkoxides	829
45.19.3.1.3.3	Method 3:	Substitution of Carbon	830
45.19.3.1.3.3.1	Variation 1:	Dealkylation	830
45.19.3.1.3.3.2	Variation 2:	Decarboxylation	830
45.19.3.1.4		Synthesis by Modification of a Substituent	831
45.19.3.1.4.1	Method 1:	Reduction of a Substituted Methyl Group	831
45.19.3.1.4.2	Method 2:	Alkylation of an Acyl Group	831
45.19.3.1.4.3	Method 3:	Reduction of an Acyl Group	832
45.19.4		<b>Product Subclass 4: Higher Acenes</b>	832
45.19.4.1		Synthesis of Product Subclass 4	832
45.19.4.1.1		Synthesis by Ring-Closure Reactions	833
45.19.4.1.1.1	Method 1:	Metal-Catalyzed Cyclization	833
45.19.4.1.1.1.1	Variation 1:	Cyclization of an Alkyne with Organozirconium Compounds	833
45.19.4.1.1.1.2	Variation 2:	Cyclization of Iodoarenes with Organozirconium Compounds	834
45.19.4.1.1.2	Method 2:	Condensation Reactions	836
45.19.4.1.1.2.1	Variation 1:	Thermal Cyclodehydration	836
45.19.4.1.1.2.2	Variation 2:	Friedel–Crafts Acylation	836
45.19.4.1.1.2.3	Variation 3:	Condensation of Dialdehydes and Diketones	837
45.19.4.1.1.2.4	Variation 4:	Condensation of Dialdehydes and Diesters	838
45.19.4.1.1.3	Method 3:	Bergman Cyclization	839
45.19.4.1.1.4	Method 4:	Diels–Alder Reaction	840
45.19.4.1.1.4.1	Variation 1:	Reaction of Furans with Arynes	840
45.19.4.1.1.4.2	Variation 2:	Reaction of Pyrroles with Arynes	842
45.19.4.1.1.4.3	Variation 3:	Reaction of Bicyclic Pentaenes with Arynes	842
45.19.4.1.1.4.4	Variation 4:	Reaction of <i>o</i> -Quinodimethanes with Dienophiles	843
45.19.4.1.1.4.5	Variation 5:	Reaction of Dienes and 1,4-Quinones	845
45.19.4.1.2		Synthesis by Ring Transformation	846
45.20		<b>Product Class 20: Cyclobutabenzenes, Biphenylenes, and [N]Phenylenes</b> S. Toyota	
45.20		<b>Product Class 20: Cyclobutabenzenes, Biphenylenes, and [N]Phenylenes</b>	855
45.20.1		<b>Product Subclass 1: Cyclobutabenzenes</b>	856
45.20.1.1		Synthesis of Product Subclass 1	856
45.20.1.1.1		Synthesis by Ring-Closure Reactions	856
45.20.1.1.1.1	Method 1:	Thermal Reaction of Dienediynes	856
45.20.1.1.1.2	Method 2:	Thermal Reaction of Dialk-1-ynylcyclobutenes	857
45.20.2		<b>Product Subclass 2: Biphenylenes</b>	858
45.20.2.1		Synthesis of Product Subclass 2	859
45.20.2.1.1		Synthesis by Ring-Closure Reactions	859

45.20.2.1.1.1	Method 1:	Formation of Two Rings by Cobalt-Catalyzed Cyclization of Alkynes .....	859
45.20.2.1.1.2	Method 2:	Formation of the Cyclobutadiene Ring by Dimerization of Benzyne .....	860
45.20.2.1.1.2.1	Variation 1:	Generated from 2-Diaziobenzoate .....	861
45.20.2.1.1.2.2	Variation 2:	Generated by Elimination from 2-Metalated Halobenzenes ..	861
45.20.2.1.1.2.3	Variation 3:	Generated by Oxidation of 1-Aminobenzotriazole .....	862
45.20.2.1.1.3	Method 3:	Formation of the Four-Membered Ring by Coupling Reactions	863
45.20.2.1.1.3.1	Variation 1:	Copper-Catalyzed Coupling of Organo Halides .....	863
45.20.2.1.1.3.2	Variation 2:	Copper-Catalyzed Coupling of Organolithiums .....	864
45.20.2.1.1.3.3	Variation 3:	Copper-Catalyzed Coupling of Organozincs .....	865
45.20.2.1.1.3.4	Variation 4:	Coupling of Organomercurials .....	867
45.20.2.1.1.3.5	Variation 5:	Thermal Radical Coupling .....	868
45.20.2.1.1.4	Method 4:	Formation of One Benzene Ring by Cycloaddition of Cyclobutabenzene .....	868
45.20.2.1.1.4.1	Variation 1:	With o-Quinodimethanes .....	868
45.20.2.1.1.4.2	Variation 2:	With Other Dienes .....	869
45.20.2.1.2	Synthesis by Substitution .....		870
45.20.2.1.2.1	Method 1:	Substitution of Hydrogen .....	870
45.20.2.1.2.1.1	Variation 1:	Electrophilic Substitution .....	870
45.20.2.1.2.1.2	Variation 2:	Substitution of Lithiated Biphenylene .....	871
45.20.2.1.2.2	Method 2:	Substitution of Non-Hydrogen Atoms .....	872
45.20.2.1.2.2.1	Variation 1:	Substitution of Silicon .....	872
45.20.2.1.2.2.2	Variation 2:	Substitution of Halogen .....	872
45.20.2.1.3	Synthesis by Modification of Substituents .....		873
45.20.2.1.3.1	Method 1:	Reduction of Oxygen-Containing Substituents .....	873
45.20.2.1.3.1.1	Variation 1:	Reduction of Carbonyls .....	873
45.20.2.1.3.1.2	Variation 2:	Reduction of Hydroxymethyl Groups .....	874
45.20.3	<b>Product Subclass 3: [N]Phenylenes</b> .....		874
45.20.3.1	Synthesis of Product Subclass 3 .....		875
45.20.3.1.1	Synthesis by Ring-Closure Reactions .....		875
45.20.3.1.1.1	Method 1:	Formation of Four- and Six-Membered Rings .....	875
45.20.3.1.1.1.1	Variation 1:	Cobalt-Catalyzed Cyclization with an Alkyne .....	875
45.20.3.1.1.1.2	Variation 2:	Cobalt-Catalyzed Cyclization with a Triyne .....	877
45.20.3.1.1.1.3	Variation 3:	Cobalt-Catalyzed Intramolecular Cyclization .....	878
45.20.3.1.1.2	Method 2:	Formation of a Six-Membered Ring by Cycloaddition .....	879
45.20.3.1.1.3	Method 3:	Formation of Four-Membered Ring by Thermal Radical Coupling .....	880
45.20.3.1.2	Synthesis by Substitution .....		881
45.20.3.1.2.1	Method 1:	Substitution of Silicon .....	881

45.21.2.1.2	Synthesis by Intramolecular Cyclization Reactions with the Formation of Two Rings .....	918
45.21.2.1.2.1	Method 1: Photodehydrocyclization of 1,4-Bis(2-phenylvinyl)benzenes ..	918
45.21.2.1.2.2	Method 2: Friedel–Crafts Cycloacylation .....	921
45.21.2.1.2.3	Method 3: Friedel–Crafts Cycloalkylation .....	922
45.21.2.1.2.4	Method 4: Homolytic Aromatic Substitution .....	923
45.21.2.1.2.5	Method 5: C–H Arylation .....	925
45.21.2.1.3	Synthesis by Intramolecular Cyclization Reactions with the Formation of Three Rings .....	926
45.21.2.1.3.1	Method 1: Cycloisomerization of Dienetriynes .....	926
45.21.2.1.3.2	Method 2: Cycloisomerization of Triynes .....	929
45.21.2.1.4	Synthesis via Intermolecular Cyclization Reactions with the Formation of One Ring .....	933
45.21.2.1.4.1	Method 1: Diels–Alder Cycloadditions .....	933
45.21.2.1.5	Synthesis via Intermolecular Cyclization Reactions with the Formation of Two Rings .....	934
45.21.2.1.5.1	Method 1: Diels–Alder Cycloadditions .....	934
45.21.2.1.6	Synthesis by Other Processes .....	937
45.21.2.1.7	Synthesis of Nonracemic Helicenes .....	938
45.21.2.1.7.1	Method 1: Resolution of Racemic Helicen-1-ols .....	938
45.21.2.1.7.2	Method 2: Asymmetric Photodehydrocyclization .....	940
45.21.2.1.7.2.1	Variation 1: Diastereoselective Photodehydrocyclization Controlled by Internal Chiral Centers .....	940
45.21.2.1.7.2.2	Variation 2: Diastereoselective Photodehydrocyclization Controlled by External Chiral Centers .....	941
45.21.2.1.7.2.3	Variation 3: Stereoconservative Photodehydrocyclization Controlled via the Helical Unit .....	941
45.21.2.1.7.3	Method 3: Asymmetric Diels–Alder Cycloaddition/Aromatizations .....	942
45.21.2.1.7.4	Method 4: Diastereoselective Aromatic Oxy-Cope Rearrangements .....	943
45.21.2.1.7.5	Method 5: Enantioselective Cycloisomerization of Aromatic Triynes .....	943
45.21.2.1.7.6	Method 6: Enantioselective Cocyclization of Arynes and Alkynes .....	944

45.21.2.1.7.7	Method 7: Stereoconservative Cyclization of 1,1'-Binaphthalene-2,2'-diylbis(methylene)bis(triphenylphosphonium) Diperoxide	945
45.21.2.1.7.8	Method 8: Stereoconservative Stevens Rearrangements	946
45.21.3	<b>Product Subclass 3: Other Angular Acenes</b>	946
45.21.3.1	Synthesis of Product Subclass 3	946
45.22	<b>Product Class 22: Pyrenes, Circulenes, and Other Condensed Acenes</b> C.-S. Chang and Y.-T. Wu	
45.22	<b>Product Class 22: Pyrenes, Circulenes, and Other Condensed Acenes</b>	955
45.22.1	<b>Product Subclass 1: Pyrenes, Cyclopenta[cd]pyrenes, and Benzopyrenes</b>	955
45.22.1.1	Synthesis of Product Subclass 1	956
45.22.1.1.1	Pyrenes	956
45.22.1.1.1.1	Method 1: Synthesis from [2.2]Metacyclophanes	956
45.22.1.1.1.1.1	Variation 1: Cycloaromatization	956
45.22.1.1.1.1.2	Variation 2: Cyclization and Aromatization of 8-Methoxy[2.2]metacyclophanes	956
45.22.1.1.1.2	Method 2: Synthesis from [2.2]Metacyclophane-1,9-dienes	957
45.22.1.1.1.3	Method 3: Lewis Acid Catalyzed Aromatization of [2.2]Metaparacyclophane-1,9-dienes	959
45.22.1.1.1.4	Method 4: Photocyclization and Aromatization of Biphenyl Derivatives	960
45.22.1.1.1.5	Method 5: Synthesis from 4-Ethynylphenanthrene Derivatives	961
45.22.1.1.2	Cyclopenta[cd]pyrene	962
45.22.1.1.2.1	Method 1: Flash-Vacuum Pyrolysis	962
45.22.1.1.2.1.1	Variation 1: Of 1-(1-Chlorovinyl)pyrene	962
45.22.1.1.2.1.2	Variation 2: Of 1,8-Bis(1-chlorovinyl)anthracene	962
45.22.1.1.2.2	Method 2: Synthesis via Cyclopenta[cd]pyren-3(4H)-one	963
45.22.1.1.3	Benzo[a]pyrene	964
45.22.1.1.3.1	Method 1: Oxidative Dehydrogenation of Dihydrobenzo[a]pyrenes	965
45.22.1.1.3.1.1	Variation 1: Synthesis via 11,12-Dihydrobenzo[a]pyrene	965
45.22.1.1.3.1.2	Variation 2: Synthesis via 9,10-Dihydrobenzo[a]pyrene	965
45.22.1.1.3.2	Method 2: Cyclodehydrogenation of a Biphenyl-Based Cyclophane	966
45.22.1.1.3.3	Method 3: Cyclization of 2-(2,6-Divinylphenyl)naphthalene Derivatives	966
45.22.1.1.3.4	Method 4: Dehydro-Diels-Alder Reaction of 1,8-Diethynyl-naphthalene with Benzyne	968
45.22.1.1.4	Benzo[e]pyrene	968
45.22.1.1.4.1	Method 1: Synthesis from Pyrene	968
45.22.1.1.4.2	Method 2: Synthesis from Pyrene-4,5-dione	969
45.22.1.1.4.3	Method 3: Photocyclization of 4,5-Diphenylphenanthrene	969
45.22.1.1.4.4	Method 4: Synthesis from 7H-Benz[de]anthracene	970
45.22.1.1.5	Dibenzo[b,def]chrysene	971

45.22.1.1.5.1	Method 1: Synthesis via a Dodecahydrodibenzo[ <i>b,def</i> ]chrysene	971
45.22.1.1.5.2	Method 2: Cyclization of 1,5-Diarylnaphthalene Derivatives	972
45.22.1.1.6	Benzo[ <i>rst</i> ]pentaphene	973
45.22.1.1.6.1	Method 1: Synthesis via Dodecahydrobenzo[ <i>rst</i> ]pentaphene	973
45.22.1.1.6.2	Method 2: Cyclization of 1,4-Diarylnaphthalene Derivatives	974
45.22.1.1.7	Dibenzo[ <i>def,p</i> ]chrysenes	975
45.22.1.1.7.1	Method 1: Scholl Reaction of 1-Phenylbenz[ <i>a</i> ]anthracene Derivatives	975
45.22.1.1.7.2	Method 2: Cyclization of 7-Aryl-5,6-dihydro-4 <i>H</i> -benz[ <i>de</i> ]anthracene Derivatives	976
45.22.1.1.7.3	Method 3: Cyclization of 12-Arylbenz[ <i>a</i> ]anthracene Derivatives	977
45.22.1.1.8	Dibenzo[ <i>fg,op</i> ]naphthacene	978
45.22.1.1.9	Dibenzo[ <i>c,mno</i> ]chrysene	978
45.22.1.1.10	Naphtho[8,1,2- <i>ghi</i> ]chrysene	979
45.22.2	<b>Product Subclass 2: Circulenes</b>	979
45.22.2.1	Synthesis of Product Subclass 2	980
45.22.2.1.1	Dibenzo[ <i>ghi,mno</i> ]fluoranthene	980
45.22.2.1.1.1	Method 1: Flash-Vacuum Pyrolysis	980
45.22.2.1.1.2	Method 2: Solution-Phase Methods	982
45.22.2.1.2	Acenaphth[3,2,1,8- <i>lmnoa</i> ]acephenanthrylene	984
45.22.2.1.2.1	Method 1: Synthesis from Fluoranthenes	984
45.22.2.1.3	8,9-Dihydroacenaphth[3,2,1,8- <i>lmnoa</i> ]acephenanthrylene	985
45.22.2.1.3.1	Method 1: Synthesis from Dibenzo[ <i>ghi,mno</i> ]fluoranthenes	985
45.22.2.1.4	<i>peri</i> -Annulated Dibenzo[ <i>ghi,mno</i> ]fluoranthenes	985
45.22.2.1.4.1	Method 1: Synthesis from 1,10-Bis(bromomethyl)dibenzo[ <i>ghi,mno</i> ]fluoranthene	985
45.22.2.1.5	Benzo- and Dibenzo-Annulated Dibenzo[ <i>ghi,mno</i> ]fluoranthenes	986
45.22.2.1.6	Indeno-Annulated Dibenzo[ <i>ghi,mno</i> ]fluoranthenes	987
45.22.2.1.6.1	Method 1: Suzuki–Heck-Type Couplings	987
45.22.2.1.6.2	Method 2: Synthesis from Dienes and Alkynes	988
45.22.2.1.7	Coronene and Its Derivatives	989
45.22.2.1.7.1	Method 1: Synthesis from Benzo[ <i>ghi</i> ]perylene	989
45.22.2.1.7.2	Method 2: Synthesis from Anthracene Derivatives	989
45.22.2.1.7.3	Method 3: Dehydrocyclization of Cyclophanes	990
45.22.2.1.7.4	Method 4: Photocyclization of a Dienylcyclophane	991
45.22.2.1.8	Benzo[1,2,3- <i>bc</i> :4,5,6- <i>b'c'</i> ]dicononene	991
45.22.2.1.9	Hexabenz[ <i>bc,ef,hi,kl,no,qr</i> ]coronenes	992
45.22.2.1.9.1	Method 1: Lewis Acid Catalyzed Cyclodehydrogenation of Hexaarylbenzenes	992
45.22.2.1.10	Tribenzo[ <i>fgh,pqr,za<sub>1</sub>b<sub>1</sub></i> ]trinaphthylenes	995
45.22.2.1.11	Peralkylated Coronenes	995

45.22.2.1.12	Dinaphtho[2,1,8,7- <i>ghij</i> :2',1',8',7'- <i>nopq</i> ]pleiadene .....	996
45.22.2.1.12.1	Method 1: Cyclization of a Dialdehyde .....	996
45.22.2.1.12.2	Method 2: Flash-Vacuum Pyrolysis of a Cyclic Sulfone .....	997
45.22.2.1.13	Naphtho[2,1,8,7- <i>ghij</i> ]naphtho[2',1',8',7':6,7,8]pleiaden[10,11,12,1- <i>nopqa</i> ]pleiadene .....	998
45.22.3	<b>Product Subclass 3: Condensed Acenes</b> .....	999
45.22.3.1	Synthesis of Product Subclass 3 .....	999
45.22.3.1.1	Perylenes .....	999
45.22.3.1.1.1	Method 1: Thermal Decomposition of a Perylene Dianhydride .....	999
45.22.3.1.1.2	Method 2: Metal-Mediated Ullmann Reactions of 1,8-Dihalonaphthalenes .....	999
45.22.3.1.2	Benzo[ <i>a</i> ]perylene .....	1000
45.22.3.1.3	Benzo[ <i>ghi</i> ]perylenes .....	1001
45.22.3.1.3.1	Method 1: Synthesis from Perylene .....	1001
45.22.3.1.3.2	Method 2: Ruthenium-Catalyzed Benzannulation .....	1001
45.22.3.1.3.3	Method 3: Photocyclization .....	1002
45.22.3.1.3.4	Method 4: Flash-Vacuum Pyrolysis .....	1003
45.22.3.1.4	Dibenzo[ <i>a,e</i> ]perylene .....	1003
45.22.3.1.5	Dibenzo[ <i>a,j</i> ]perylene .....	1004
45.22.3.1.6	Dibenzo[ <i>cd,lm</i> ]perylene .....	1005
45.22.3.1.6.1	Method 1: Dimerization of 1 <i>H</i> -Phenalen-1-one .....	1005
45.22.3.1.7	Naphtho[2,1- <i>a</i> ]perylene .....	1006
45.22.3.1.8	Tribenzo[ <i>de,kl,rst</i> ]pentaphene .....	1006
45.22.3.1.9	Dibenzo[ <i>de,mn</i> ]naphthacene .....	1007
45.22.3.1.10	Phenanthro[9,10- <i>b</i> ]triphenylene .....	1008
45.22.3.1.10.1	Method 1: Dehydrogenation of Octadecahydrophenanthro[9,10- <i>b</i> ]triphenylene .....	1008
45.22.3.1.10.2	Method 2: Zirconium-Mediated Coupling .....	1009
45.22.3.1.10.3	Method 3: Palladium-Catalyzed [2 + 2 + 2] Cycloaddition .....	1010
45.22.3.1.11	Benzo[ <i>c</i> ]naphtho[2,1- <i>p</i> ]chrysenes .....	1010
45.23	<b>Product Class 23: Annulated Polycyclic Aromatic Hydrocarbons</b> W.-C. Lin and Y.-T. Wu	
45.23	<b>Product Class 23: Annulated Polycyclic Aromatic Hydrocarbons</b> .....	1017
45.23.1	<b>Product Subclass 1: Acenaphthylenes</b> .....	1018
45.23.1.1	Synthesis of Product Subclass 1 .....	1018
45.23.1.1.1	Method 1: Synthesis from 1,2-Dihydroacenaphthylene Derivatives .....	1018
45.23.1.1.2	Method 2: Synthesis from 1-Bromo- or 1,3-Dibromo-1 <i>H</i> ,3 <i>H</i> -naphtho[1,8- <i>cd</i> ]thiopyran 2,2-Dioxide .....	1019
45.23.1.1.3	Method 3: Catalytic Annulation of Naphthalene Derivatives with Alkynes .....	1020

45.23.2	<b>Product Subclass 2: Cyclopent[fg]acenaphthylenes</b>	1022
45.23.2.1	Synthesis of Product Subclass 2	1022
45.23.3	<b>Product Subclass 3: Aceanthrylenes</b>	1022
45.23.3.1	Synthesis of Product Subclass 3	1022
45.23.3.1.1	Method 1: Pyrolysis of 9-Ethynylanthracene	1022
45.23.3.1.2	Method 2: Zirconium(IV)/Nickel(II)-Mediated Cycloadditions	1023
45.23.3.1.3	Method 3: Palladium-Catalyzed Cycloaddition Reactions	1023
45.23.4	<b>Product Subclass 4: 1<i>H</i>-Phenalenes and Related Compounds</b>	1024
45.23.4.1	Synthesis of Product Subclass 4	1024
45.23.4.1.1	Method 1: Synthesis of 1 <i>H</i> -Phenalenes	1024
45.23.4.1.1.1	Variation 1: By Dehydration of 2,3-Dihydro-1 <i>H</i> -phenalen-1-ols	1024
45.23.4.1.1.2	Variation 2: Via 1 <i>H</i> -Phenalen-1-one	1025
45.23.4.1.2	Method 2: Synthesis of Heteroatom-Substituted Phenalenes	1026
45.23.4.1.2.1	Variation 1: Synthesis of Naphtho[1,8- <i>bc</i> ]pyrans	1026
45.23.4.1.2.2	Variation 2: Synthesis of 1-Methyl-1 <i>H</i> -benzo[ <i>de</i> ]quinolines	1027
45.23.4.1.3	Method 3: Synthesis of Cyclopenta[ <i>a</i> ]phenalenes	1029
45.23.5	<b>Product Subclass 5: Fluoranthenes</b>	1029
45.23.5.1	Synthesis of Product Subclass 5	1029
45.23.5.1.1	Method 1: Diels–Alder Reaction	1029
45.23.5.1.1.1	Variation 1: From Cyclopentadienone Derivatives	1029
45.23.5.1.1.2	Variation 2: From Acenaphthylene	1031
45.23.5.1.2	Method 2: Thermolytic Rearrangement of 1-(But-1-en-3-ynyl)-8-ethylnaphthalenes	1032
45.23.5.1.3	Method 3: Metal-Catalyzed C–C Bond-Forming Reactions	1033
45.23.5.1.3.1	Variation 1: Palladium-Catalyzed Annulations	1033
45.23.5.1.3.2	Variation 2: Rhodium-Catalyzed [(2 + 2) + 2] Cycloaddition	1034
45.23.5.1.3.3	Variation 3: Tellurium-Mediated Cycloaromatization	1035
45.23.6	<b>Product Subclass 6: Benzo[<i>j</i>]fluoranthenes</b>	1036
45.23.6.1	Synthesis of Product Subclass 6	1036
45.23.6.1.1	Method 1: Palladium-Catalyzed Annulation of Binaphthalenyl Trifluoromethanesulfonates	1036
45.23.7	<b>Product Subclass 7: Benzo[<i>k</i>]fluoranthenes</b>	1037
45.23.7.1	Synthesis of Product Subclass 7	1037
45.23.7.1.1	Method 1: Synthesis from 1,8-Bis(diphenylethynyl)naphthalene	1037
45.23.7.1.2	Method 2: Diels–Alder Reaction	1037
45.23.7.1.3	Method 3: Palladium-Catalyzed Annulations	1038
45.23.8	<b>Product Subclass 8: Benz[<i>e</i>]acephenanthrylenes</b>	1038
45.23.8.1	Synthesis of Product Subclass 8	1038
45.23.8.1.1	Method 1: Palladium-Catalyzed Annulation Reactions	1038
45.23.8.1.1.1	Variation 1: From Phenanthrene Derivatives	1038
45.23.8.1.1.2	Variation 2: From Fluorene Derivatives	1039

45.23.8.1.2	Method 2: Base-Induced Cyclization of 9-(2-Bromobenzylidene)-9H-fluorene Derivatives .....	1040
45.24	<b>Product Class 24: Pentalenes, s-Indacenes, <i>as</i>-Indacenes, Azulenes, and Heptalenes, and Their Benzo Derivatives</b> K. Abou-Hadeed and H.-J. Hansen	
45.24	<b>Product Class 24: Pentalenes, s-Indacenes, <i>as</i>-Indacenes, Azulenes, and Heptalenes, and Their Benzo Derivatives</b> .....	1043
45.24.1	<b>Product Subclass 1: Pentalenes</b> .....	1044
45.24.1.1	Synthesis of Product Subclass 1 .....	1045
45.24.1.1.1	Pentalene Dimers .....	1045
45.24.1.1.1.1	Method 1: Elimination of Hydrogen Bromide from 1-Bromo-1,2-dihydropentalene Followed by Dimerization ..	1045
45.24.1.1.1.2	Method 2: Oxidative Coupling of Dilithium Pentalenediide .....	1046
45.24.1.1.2	Benzopentalenes and Their Heteroatom Analogues .....	1046
45.24.1.1.2.1	Method 1: Benzopentalenes by Flash-Vacuum Pyrolysis of Benzofurandiones .....	1047
45.24.1.1.2.2	Method 2: 1H-Cyclopent[cd]indene by Gas-Phase Dehydrogenation/Decarboxylation .....	1048
45.24.1.1.2.3	Method 3: 1H-Cyclopent[cd]indene by Gas-Phase Elimination of Acetic Acid .....	1048
45.24.1.1.2.4	Method 4: 1H-Cyclopent[cd]indene by Flash-Vacuum Pyrolysis Induced Rearrangement of 1,2-Didehydronaphthalene .....	1049
45.24.1.1.3	Dibenzopentalenes .....	1049
45.24.1.1.3.1	Method 1: Dual Flash-Vacuum Pyrolysis of 1-Naphthylmethyl 3-Phenylprop-2-ynoate .....	1049
45.24.1.1.3.2	Method 2: Rearrangement of Anthryl-9,10-dicarbenic Species .....	1050
45.24.1.1.3.3	Method 3: Platinum(IV)-Catalyzed Ring Closure of 1,2-Bis(phenylethynyl)benzenes .....	1050
45.24.1.1.3.4	Method 4: Tellurium-Mediated Chlorine Transfer .....	1051
45.24.1.1.3.5	Method 5: Transition-Metal-Catalyzed Homocoupling of 1-Ethynyl-2-halobenzenes .....	1052
45.24.1.1.3.6	Method 6: Carbolithiation of 5,6,11,12-Tetrahydrodibenzo[ <i>a,e</i> ]cyclooctene .....	1054
45.24.2	<b>Product Subclass 2: s-Indacenes</b> .....	1057
45.24.2.1	Synthesis of Product Subclass 2 .....	1057
45.24.2.1.1	1,3,5,7-Tetrasubstituted s-Indacenes and Their Heteroatom Analogues .....	1057
45.24.2.1.1.1	Method 1: 1,3,5,7-Tetra- <i>tert</i> -butyl-s-indacene by Cyclocondensation ..	1058
45.24.2.1.1.2	Method 2: 1,3,5,7-Tetra- <i>tert</i> -butyl-s-indacene by Acid-Catalyzed Condensation .....	1058
45.24.3	<b>Product Subclass 3: <i>as</i>-Indacenes</b> .....	1058
45.24.4	<b>Product Subclass 4: Azulenes and Benzazulenes</b> .....	1060

45.24.4.1	Synthesis of Product Subclass 4	1060
45.24.4.1.1	Azulenenes	1060
45.24.4.1.1.1	Method 1: Carbenoid [2 + 1]-Addition Reactions	1060
45.24.4.1.1.1.1	Variation 1: Intermolecular Carbenoid Addition to a 4,7-Dihydroindane	1060
45.24.4.1.1.1.2	Variation 2: Intramolecular Carbenoid Addition of (3-Aryl-3-bromopropanoyl)diazomethanes	1061
45.24.4.1.1.1.3	Variation 3: Reaction of 4-Aryl-2-oxobutanoates with Lithium Diazo(trimethylsilyl)methane	1063
45.24.4.1.1.2	Method 2: Ketene [2 + 2]-Addition Reactions	1065
45.24.4.1.1.2.1	Variation 1: With 3-Chloroazulen-2(1 <i>H</i> )-one as an Intermediate	1065
45.24.4.1.1.2.2	Variation 2: Addition of Dichloroketene to 7-Methylcyclohepta-1,3,5-triene	1066
45.24.4.1.1.2.3	Variation 3: With 1-Chloroazulenenes as Intermediates	1067
45.24.4.1.1.3	Method 3: [6 + 4]-Addition Reactions	1068
45.24.4.1.1.3.1	Variation 1: Of 2-(Cyclopenta-2,4-dien-1-ylidene)-1,3-dioxolane and 2 <i>H</i> -Pyran-2-one	1068
45.24.4.1.1.3.2	Variation 2: Of a 6-Aminofulvene and Thiophene 1,1-Dioxides	1069
45.24.4.1.1.3.3	Variation 3: Of Substituted Fulvenes and Thiophene 1,1-Dioxides	1070
45.24.4.1.1.4	Method 4: [7 + 3]-Addition Reactions	1071
45.24.4.1.1.5	Method 5: [8 + 2]-Addition Reactions	1072
45.24.4.1.1.5.1	Variation 1: Reaction of Substituted Tropone Dimethyl Ketals with Dimethyl Acetylenedicarboxylate	1072
45.24.4.1.1.5.2	Variation 2: Reaction of Highly Methylated 2 <i>H</i> -Cyclohepta[ <i>b</i> ]furan-2-ones with Enol Ethers or Enamines	1073
45.24.4.1.1.5.3	Variation 3: Thermal Intermolecular Reactions of 2 <i>H</i> -Cyclohepta[ <i>b</i> ]furan-2-ones	1075
45.24.4.1.1.5.4	Variation 4: Reactions of 2 <i>H</i> -Cyclohepta[ <i>b</i> ]furan-2-ones with Vinyl Ethers, Acetals, Ortho Esters, or Their Analogues	1076
45.24.4.1.1.5.5	Variation 5: Synthesis of Methyl (Azulen-2-yl)acetates	1078
45.24.4.1.1.5.6	Variation 6: 2-Alkyl-3-cyanoazulene-1-carboxylic Acids as Precursors for 2-Alkylazulenenes	1078
45.24.4.1.1.6	Method 6: Transformation of Azulen-1(8 <i>aH</i> )-ones into 1-Acetoxyazulenenes	1079
45.24.4.1.1.7	Method 7: Seven-Membered Ring Formation through a Robinson Annulation	1080
45.24.4.1.1.8	Method 8: Five-Membered Ring Formation through an Intramolecular Wittig Reaction	1080
45.24.4.1.1.8.1	Variation 1: Reaction of 5-[(Dimethylamino)methylene]cyclopenta-1,3-dienecarbaldehyde with an Allylidene phosphorane	1081
45.24.4.1.1.8.2	Variation 2: Reaction of Dimethyl Acetylenedicarboxylate with [(Triphenylarsoranylidene)methyl]cycloheptatrienones	1082
45.24.4.1.1.9	Method 9: Five-Membered Ring Formation through Nazarov Cyclization Reactions	1082
45.24.4.1.1.10	Method 10: Ziegler–Hafner Synthesis of Deuterated Azulenenes	1084
45.24.4.1.1.11	Method 11: Methyl Azulene-2-carboxylates by the Hafner Method	1084

45.24.4.1.1.12	Method 12:	Conversion of 2-Arylazulene-1,1(8aH)-dicyanitriles into 2-Arylazulene-1-cyanitriles .....	1085
45.24.4.1.2	Benzazulenes .....		1086
45.24.4.1.2.1	Method 1:	Benz[ <i>a</i> ]azulenes by an Intramolecular Reaction of a Carbenoid .....	1087
45.24.4.1.2.2	Method 2:	Benz[ <i>a</i> ]azulenes by an Intramolecular Heck Reaction .....	1087
45.24.4.1.2.3	Method 3:	Benz[ <i>a</i> ]azulenes by Construction of the Benzo Ring .....	1089
45.24.4.1.2.4	Method 4:	Synthesis of Heteroatom Analogues of Benz[ <i>a</i> ]azulene .....	1090
45.24.4.1.2.5	Method 5:	Benz[ <i>cd</i> ]azulenes by the Buchner Reaction of Cyclopent[ <i>cd</i> ]azulenes .....	1091
45.24.4.1.2.6	Method 6:	Benz[ <i>cd</i> ]azulenes by Successive Formation of the Benzo Ring	1091
45.24.4.1.2.7	Method 7:	Alkylation of 4,5-Dihydro-3 <i>H</i> -benz[ <i>cd</i> ]azulene To Give 9 <i>b</i> -Methyl-9 <i>bH</i> -benz[ <i>cd</i> ]azulene .....	1092
45.24.5	<b>Product Subclass 5: Heptalenes and Benzoheptalenes</b> .....		1092
45.24.5.1	Synthesis of Product Subclass 5 .....		1092
45.24.5.1.1	Heptalenes .....		1092
45.24.5.1.1.1	Method 1:	Hafner's Procedure .....	1093
45.24.5.1.1.1.1	Variation 1:	Reaction in Toluene .....	1094
45.24.5.1.1.1.2	Variation 2:	Reaction in Acetonitrile in the Presence of Dihydridotetrakis(triphenylphosphine)ruthenium .....	1095
45.24.5.1.1.2	Method 2:	Rearrangement of Dimethyl 11-Methyltricyclo[6.2.2.0 <sup>1,7</sup> ]dodeca-2,4,6,9,11-pentaene- 9,10-dicarboxylates .....	1096
45.24.5.1.1.3	Method 3:	Photochemical $\pi$ -Bond Shift in Heptalene-4,5-dicarboxylates	1097
45.24.5.1.1.4	Method 4:	Thermal Rearrangement of Heptalene-4,5-dicarboxylates ..	1098
45.24.5.1.2	Benzoheptalenes .....		1099
45.24.5.1.2.1	Method 1:	Decarboxylation of Dimethyl Benzo[ <i>a</i> ]heptalene-6,7-dicarboxylate .....	1099
45.24.5.1.2.2	Method 2:	Methoxy-Substituted Benzo[ <i>a</i> ]heptalenes from Colchiceines	1100
45.24.5.1.2.3	Method 3:	Thermal Reaction of Benz[ <i>a</i> ]azulenes with Acetylenedicarboxylates .....	1101
45.24.5.1.2.4	Method 4:	Alkylation of Heptalene-4,5-dicarboxylates with (Sulfonylmethyl)lithiums .....	1102
45.24.5.1.2.4.1	Variation 1:	Alkylation of Heptalene Lactones with [(Phenylsulfonyl)methyl]lithium .....	1104
45.24.5.1.2.4.2	Variation 2:	Alkylation of Methyl 4(5)-[(Phenylsulfonyl)acetyl]heptalene-5(4)-carboxylates with [(Phenylsulfonyl)methyl]lithium .....	1104
45.24.5.1.2.5	Method 5:	Diels–Alder Reaction of Heptaleno[1,2- <i>c</i> ]furans with Electron-Deficient Alkenes .....	1105
45.24.5.1.2.5.1	Variation 1:	Reaction with (2 <i>E</i> )-But-2-enedinitrile .....	1105
45.24.5.1.2.5.2	Variation 2:	Reaction with Dimethyl (2 <i>Z</i> )-But-2-enedioate .....	1107
45.24.5.1.2.5.3	Variation 3:	Reaction with (Z)-1,2-Bis(phenylsulfonyl)ethene .....	1107
45.24.5.1.2.6	Method 6:	Benzo[ $\sigma$ ]heptalene-2,3-dicarboxylates by Electrocyclization ..	1109

45.25	<b>Product Class 25: Extended Polyaromatic Hydrocarbons: Graphite, Fullerene, and Carbon Nanotube Substructures</b> I. G. Stará and I. Starý	
45.25	<b>Product Class 25: Extended Polyaromatic Hydrocarbons: Graphite, Fullerene, and Carbon Nanotube Substructures</b> .....	1115
45.25.1	<b>Product Subclass 1: Graphite Substructures and Graphene</b> .....	1115
45.25.1.1	Synthesis of Product Subclass 1 .....	1115
45.25.1.1.1	Synthesis of Graphite Substructures .....	1115
45.25.1.1.1.1	Method 1: Intermolecular Fusion of Small Polycyclic Aromatic Hydrocarbon Building Blocks .....	1118
45.25.1.1.1.2	Method 2: Intramolecular Oxidative Cyclodehydrogenation of Oligophenylenes .....	1118
45.25.1.1.1.3	Method 3: Intramolecular Photodehydrocyclization .....	1122
45.25.1.1.1.4	Method 4: Cyclodehydrogenation on Copper .....	1123
45.25.1.1.2	Synthesis of Graphene .....	1124
45.25.1.1.2.1	Method 1: Exfoliation from Highly Oriented Pyrolytic Graphite .....	1124
45.25.1.1.2.2	Method 2: Synthesis from Silicon Carbide .....	1125
45.25.1.1.2.3	Method 3: Oxidation of Graphite: The Graphene Oxide Approach .....	1125
45.25.1.1.2.4	Method 4: Other Processes .....	1125

45.28.3.1.1	Method 1: Synthesis by Acyloin Condensation .....	1298
45.28.3.1.2	Method 2: Synthesis by Furan Hydrolysis .....	1299
45.28.3.1.3	Method 3: Synthesis by Substitution of Dihaloalkanes .....	1300
45.28.3.1.4	Method 4: Synthesis by Cycloaddition .....	1302
45.28.3.1.5	Method 5: Synthesis by Rearrangement .....	1305
45.29	<b>Product Class 29: Polynuclear Cyclophanes</b> Y. Tobe and T. Takeda	
45.29	<b>Product Class 29: Polynuclear Cyclophanes</b> .....	1311
45.29.1	<b>Product Subclass 1: Polynuclear Cyclophanes with Bridging Aliphatic Carbon Groups</b> .....	1313
45.29.1.1	Synthesis of Product Subclass 1 .....	1313
45.29.1.1.1	Method 1: Construction of the Bridge by Condensation Reactions .....	1313
45.29.1.1.1.1	Variation 1: By Acyloin Condensation .....	1313
45.29.1.1.1.2	Variation 2: By Aldol Condensation .....	1315
45.29.1.1.1.3	Variation 3: By Wittig Reaction .....	1316
45.29.1.1.1.4	Variation 4: By Alkene Metathesis .....	1317
45.29.1.1.1.5	Variation 5: By McMurry Reaction .....	1318
45.29.1.1.2	Method 2: Construction of the Bridge by Coupling Reactions .....	1321
45.29.1.1.2.1	Variation 1: By Friedel–Crafts Reaction .....	1321
45.29.1.1.2.2	Variation 2: By Wurtz Coupling .....	1321
45.29.1.1.2.3	Variation 3: By Alkylation of an Active Methylene Group .....	1322
45.29.1.1.2.4	Variation 4: By Coupling Using Tosylmethyl Isocyanide .....	1323
45.29.1.1.3	Method 3: Construction of the Bridge by Addition Reactions .....	1325
45.29.1.1.3.1	Variation 1: By Cycloaddition of <i>p</i> -Quinodimethanes .....	1325
45.29.1.1.3.2	Variation 2: By Cycloaddition of <i>o</i> -Quinodimethanes .....	1326
45.29.1.1.3.3	Variation 3: By Photochemical [2 + 2] Cycloaddition of Alkenes .....	1327
45.29.1.1.3.4	Variation 4: By Acid-Catalyzed Addition of Alkenes .....	1328
45.29.1.1.3.5	Variation 5: By C–H Insertion of a Carbene .....	1329
45.29.1.1.3.6	Variation 6: By Insertion of Alkenes into the Bridge .....	1329
45.29.1.1.4	Method 4: Construction of the Bridge by Extrusion of a Sulfur or Selenium Atom .....	1330
45.29.1.1.4.1	Variation 1: By Thermal Extrusion of Sulfur Dioxide .....	1330
45.29.1.1.4.2	Variation 2: By Photochemical Extrusion of Sulfur .....	1332
45.29.1.1.4.3	Variation 3: By Wittig Rearrangement .....	1333
45.29.1.1.4.4	Variation 4: By Stevens Rearrangement .....	1334
45.29.1.1.4.5	Variation 5: By Extrusion of Selenium Atoms .....	1336
45.29.1.1.5	Method 5: Construction of the Aromatic Ring .....	1336
45.29.1.1.5.1	Variation 1: By Cyclotrimerization of Alkynes .....	1336
45.29.1.1.5.2	Variation 2: By Valence Isomerization of Dewar Benzene Isomers .....	1337
45.29.1.1.6	Method 6: Modification of the Aromatic Ring .....	1338

45.29.1.1.6.1	Variation 1: By Annulation to the Aromatic Rings	1338
45.29.1.1.6.2	Variation 2: By Oxidative Transformation of the Aromatic Rings	1339
45.29.1.1.7	Method 7: Isomerization by Migration of the Bridge	1339
45.29.2	<b>Product Subclass 2: Polynuclear Cyclophanes without Bridging Aliphatic Carbon Groups</b>	1340
45.29.2.1	Synthesis of Product Subclass 2	1340
45.29.2.1.1	Method 1: Cross Coupling of Aryl Halides	1340
45.29.2.1.1.1	Variation 1: Oxidative Coupling of Arylene Di-Grignard Reagents	1340
45.29.2.1.1.2	Variation 2: Coupling via Lipshutz Cuprates	1342
45.29.2.1.1.3	Variation 3: Coupling of Arylstannanes Using Copper(II) Nitrate	1343
45.29.2.1.2	Method 2: Construction of the Benzene Ring by Elimination	1344
45.30	<b>Product Class 30: Conjugated Polyenes, Including Cyclic Polyenes That Are Not Fully Conjugated</b> S. Koo	
45.30	<b>Product Class 30: Conjugated Polyenes, Including Cyclic Polyenes That Are Not Fully Conjugated</b>	1349
45.30.1	<b>Product Subclass 1: Open-Chain Noncarotenoid Conjugated Polyenes</b>	1350
45.30.1.1	Synthesis of Product Subclass 1	1350
45.30.1.1.1	Method 1: Palladium-Catalyzed Coupling Reactions	1351
45.30.1.1.1.1	Variation 1: Stille Coupling	1351
45.30.1.1.1.2	Variation 2: Negishi Coupling	1355
45.30.1.1.1.3	Variation 3: Suzuki Coupling	1356
45.30.1.1.1.4	Variation 4: Sonogashira Coupling	1358
45.30.1.1.1.5	Variation 5: Heck Reaction	1360
45.30.1.1.1.6	Variation 6: Silicon-Based Coupling	1361
45.30.1.1.1.7	Variation 7: Homocoupling	1362
45.30.1.1.2	Method 2: Rhodium-Catalyzed Coupling Reactions	1363
45.30.1.1.3	Method 3: Nickel-Catalyzed Coupling Reactions	1364
45.30.1.1.4	Method 4: Reductive Alkenation of Carbonyl Compounds	1365
45.30.1.1.5	Method 5: Sulfone-Mediated Alkenation	1365
45.30.1.1.5.1	Variation 1: Julia Alkenation	1366
45.30.1.1.5.2	Variation 2: Julia–Kocienski Alkenation	1368
45.30.1.1.6	Method 6: Wittig and Related Reactions	1369
45.30.1.1.6.1	Variation 1: Wittig Reaction	1370
45.30.1.1.6.2	Variation 2: Horner–Wadsworth–Emmons Modification	1371
45.30.1.1.7	Method 7: Coupling with Vinylic Organolithium Reagents	1372
45.30.1.1.8	Method 8: Lewis Acid Promoted Coupling Reactions	1374
45.30.1.1.9	Method 9: Ramberg–Bäcklund Rearrangement	1376
45.30.1.1.10	Method 10: Oxidative Ring-Fragmentation Reactions	1377
45.30.1.1.11	Method 11: Cyclopropyl Carbinol Rearrangement	1379
45.30.1.2	Applications of Product Subclass 1 in Organic Synthesis	1379
45.30.1.2.1	Method 1: Lewis Acid Catalyzed Cycloisomerization of Hexatriene	1379

45.30.1.2.2	Method 2: Thermal Electrocyclization of Hexatriene .....	1380
45.30.2	<b>Product Subclass 2: Carotenoid Compounds</b> .....	1381
45.30.2.1	Synthesis of Product Subclass 2 .....	1381
45.30.2.1.1	Method 1: Palladium-Catalyzed Coupling Reactions .....	1382
45.30.2.1.1.1	Variation 1: Stille Coupling .....	1382
45.30.2.1.1.2	Variation 2: Negishi Coupling .....	1385
45.30.2.1.1.3	Variation 3: Suzuki Coupling .....	1386
45.30.2.1.2	Method 2: Reductive Alkenation of Carbonyl Compounds .....	1388
45.30.2.1.3	Method 3: Sulfone-Mediated Alkenation .....	1389
45.30.2.1.3.1	Variation 1: Julia Alkenation .....	1389
45.30.2.1.3.2	Variation 2: Julia–Kocienski Alkenation .....	1391
45.30.2.1.3.3	Variation 3: Reaction with 3-Sulfolenes .....	1393
45.30.2.1.3.4	Variation 4: Double Elimination Reaction .....	1394
45.30.2.1.4	Method 4: Wittig Reaction .....	1396
45.30.2.1.5	Method 5: Extended Knoevenagel Condensation .....	1398
45.30.2.1.6	Method 6: Ramberg–Bäcklund Rearrangement .....	1400
45.30.3	<b>Product Subclass 3: Cycloheptatrienes</b> .....	1402
45.30.3.1	Synthesis of Product Subclass 3 .....	1402
