## **Volume 6: Boron Compounds**

	<b>Preface</b> .....	V
	<b>Volume Editor's Preface</b> .....	VII
	<b>Table of Contents</b> .....	XIII
	<b>Introduction</b>	
	D. E. Kaufmann .....	1
<b>6.1</b>	<b>Product Class 1: Boron Compounds</b>	
<b>6.1.1</b>	<b>Product Subclass 1: Hydroboranes</b>	
	D. S. Matteson .....	5
<b>6.1.2</b>	<b>Product Subclass 2: Borohydrides</b>	
	G. Chen .....	81
<b>6.1.3</b>	<b>Product Subclass 3: Diborane(4) Compounds</b>	
	T. B. Marder .....	117
<b>6.1.4</b>	<b>Product Subclass 4: Metalloboranes</b>	
	H. Nöth .....	139
<b>6.1.5</b>	<b>Product Subclass 5: Haloboranes</b>	
	D. S. Matteson .....	179
<b>6.1.6</b>	<b>Product Subclass 6: Haloborates</b>	
	B. Schilling and D. E. Kaufmann .....	247
<b>6.1.7</b>	<b>Product Subclass 7: Hydroxyboranes</b>	
	N. Miyaura .....	257
<b>6.1.8</b>	<b>Product Subclass 8: Boroxanes</b>	
	M. Periasamy, M. Seenivasaperumal, and S. Sivakumar .....	301
<b>6.1.9</b>	<b>Product Subclass 9: Acyloxyboranes</b>	
	M. Periasamy, M. N. Reddy, and N. S. Kumar .....	321
<b>6.1.10</b>	<b>Product Subclass 10: Vinyloxyboranes</b>	
	C. Gennari, S. Ceccarelli, and U. Piarulli .....	337
<b>6.1.11</b>	<b>Product Subclass 11: Aryloxy- and Alkoxyboranes (Including Protecting Groups)</b>	
	K. Ishihara and H. Yamamoto .....	403

---

6.1.12	<b>Product Subclass 12: Aryloxy- and Alkoxyborates</b> K. Ishihara and H. Yamamoto .....	423
6.1.13	<b>Product Subclass 13: Peroxyboranes</b> K. Ishihara and H. Yamamoto .....	437
6.1.14	<b>Product Subclass 14: Sulfanyl- and Selanylboranes</b> C. Habben and D. E. Kaufmann .....	443
6.1.15	<b>Product Subclass 15: Aminoboranes and Borane–Amine Complexes</b> B. Carboni and F. Carreaux .....	455
6.1.16	<b>Product Subclass 16: Phosphinoboranes and Borane–Phosphine Complexes</b> A. C. Gaumont and B. Carboni .....	485
6.1.17	<b>Product Subclass 17: <math>\alpha</math>-Metalloalkylboranes</b> Bakthan Singaram .....	513
6.1.18	<b>Product Subclass 18: Cyanoboranes</b> D. Gabel and M. B. El-Zaria .....	541
6.1.19	<b>Product Subclass 19: Carboxyboranes and Related Derivatives</b> D. Gabel and M. B. El-Zaria .....	563
6.1.20	<b>Product Subclass 20: <math>\alpha</math>-Haloalkylboronates</b> D. S. Matteson .....	585
6.1.21	<b>Product Subclass 21: <math>\alpha</math>-Alkoxyalkyl-, <math>\alpha</math>-Sulfanylalkyl-, and <math>\alpha</math>-Aminoalkylboronates</b> D. S. Matteson .....	607
6.1.22	<b>Product Subclass 22: <math>\alpha</math>-Phosphinoalkylboranes</b> D. S. Matteson .....	623
6.1.23	<b>Product Subclass 23: Alk-1-ynylboranes and Alkyn-1-ylboronates</b> D. E. Kaufmann and N. Öcal .....	635
6.1.24	<b>Product Subclass 24: Borylketenes</b> D. Gabel .....	659
6.1.25	<b>Product Subclass 25: Allenylboranes</b> D. E. Kaufmann and C. Burmester .....	667
6.1.26	<b>Product Subclass 26: Aryl- and Hetarylboranes</b> N. Miyaura .....	677
6.1.27	<b>Product Subclass 27: Dienylboranes</b> K. Albrecht and D. E. Kaufmann .....	697

<b>6.1.28</b>	<b>Product Subclass 28: Vinylboranes</b> M. Vaultier and G. Alcaraz .....	721
<b>6.1.29</b>	<b>Product Subclass 29: <math>\alpha</math>-Boryl Carbonyl Compounds</b> H. Abu Ali, V. M. Dembitsky, and M. Srebnik .....	855
<b>6.1.30</b>	<b>Product Subclass 30: <math>\beta</math>-Haloalkylboranes</b> H. Abu Ali, V. M. Dembitsky, and M. Srebnik .....	867
<b>6.1.31</b>	<b>Product Subclass 31: <math>\beta</math>-Alkoxyalkyl-, <math>\beta</math>-Sulfanylalkyl-, and <math>\beta</math>-Aminoalkylboranes</b> H. Abu Ali, V. M. Dembitsky, and M. Srebnik .....	881
<b>6.1.32</b>	<b>Product Subclass 32: <math>\beta</math>-Silylalkyl- and <math>\beta</math>-Stannylalkylboranes</b> P. J. Murphy .....	893
<b>6.1.33</b>	<b>Product Subclass 33: Propargylboranes</b> D. E. Kaufmann and C. Burmester .....	913
<b>6.1.34</b>	<b>Product Subclass 34: Benzylboranes and Benzylboronates</b> M. Zaidlewicz and J. Meller .....	921
<b>6.1.35</b>	<b>Product Subclass 35: Allylboranes</b> Y. Bubnov .....	945
<b>6.1.36</b>	<b>Product Subclass 36: <math>\beta</math>-Boryl Carbonyl Compounds</b> D. S. Matteson .....	1073
<b>6.1.37</b>	<b>Product Subclass 37: <math>\gamma</math>-Haloalkylboranes</b> H. Abu Ali, V. M. Dembitsky, and M. Srebnik .....	1083
<b>6.1.38</b>	<b>Product Subclass 38: Trialkylboranes</b> M. Zaidlewicz and M. Krzeminski .....	1097
<b>6.1.39</b>	<b>Product Subclass 39: Tetraaryl- and Tetraalkylborates and Related Organometallic Compounds</b> D. E. Kaufmann and M. Köster .....	1217
<b>6.1.40</b>	<b>Product Subclass 40: Carboranes and Metallacarboranes</b> F. Teixidor and C. Viñas .....	1235
<b>6.1.41</b>	<b>Product Subclass 41: Boron-Containing Polymers</b> D. Gabel .....	1277
	<b>Keyword Index</b> .....	1289
	<b>Author Index</b> .....	1351
	<b>Abbreviations</b> .....	1403

## Table of Contents

### Introduction

D. E. Kaufmann

<b>Introduction</b> .....	1
---------------------------	---

## 6.1 Product Class 1: Boron Compounds

### 6.1.1 Product Subclass 1: Hydroboranes

D. S. Matteson

<b>6.1.1</b>	<b>Product Subclass 1: Hydroboranes</b> .....	5
	Synthesis of Product Subclass 1 .....	6
<b>6.1.1.1</b>	Diborane and Borane–Ether Complexes .....	6
<b>6.1.1.1.1</b>	Method 1: From Tetrahydroborates with Lewis Acids .....	6
<b>6.1.1.1.1.1</b>	Variation 1: From Tetrahydroborate with Protic Acids .....	8
<b>6.1.1.1.1.2</b>	Variation 2: From Tetrahydroborates with Iodine .....	9
<b>6.1.1.1.1.3</b>	Variation 3: Introduction of Isotopic Labels via Labeled Boranes .....	10
<b>6.1.1.2</b>	Substituted Tricoordinate Boranes .....	11
<b>6.1.1.2.1</b>	Method 1: Halohydroboranes from Boron Trichloride and Trialkylsilanes ·	12
<b>6.1.1.2.2</b>	Method 2: Oxyhydroboranes from Diborane and Hydroxy Compounds ··	16
<b>6.1.1.3</b>	Asymmetric Acyloxyboranes .....	18
<b>6.1.1.4</b>	Sulfanylhydroboranes .....	18
<b>6.1.1.5</b>	Aminohydroboranes .....	19
<b>6.1.1.6</b>	Borazines .....	19
<b>6.1.1.7</b>	Alkylhydroboranes by Hydroboration .....	21
<b>6.1.1.7.1</b>	Method 1: Synthesis by Hydroboration .....	21
<b>6.1.1.7.2</b>	Method 2: Asymmetric Alkylhydroboranes .....	23
<b>6.1.1.8</b>	Alkylhydroboranes by Other Routes .....	29
<b>6.1.1.8.1</b>	Method 1: Alkylboranes .....	29
<b>6.1.1.8.1.1</b>	Variation 1: Synthesis from Alkylborohydrides .....	30
<b>6.1.1.8.1.2</b>	Variation 2: Synthesis from Alkylheteroboranes .....	33
<b>6.1.1.8.1.3</b>	Variation 3: Synthesis from Alkyldichloroboranes .....	34
<b>6.1.1.9</b>	Hydroborane–Lewis Base Complexes .....	35
<b>6.1.1.9.1</b>	Method 1: Borane–Dialkyl Sulfides .....	35
<b>6.1.1.9.2</b>	Method 2: Borane–Amines .....	35
<b>6.1.1.9.2.1</b>	Variation 1: Hydroboration with Borane–Amines .....	37
<b>6.1.1.9.2.2</b>	Variation 2: Reductions with Borane–Amines .....	40
<b>6.1.1.9.2.3</b>	Variation 3: Group Substitution within Borane–Amines .....	43

6.1.1.10	Diaminoboronium Cations	44
6.1.1.11	Borane–Phosphines	45
6.1.1.12	Borane–Carbonyl	46
	Applications of Product Subclass 1 in Organic Synthesis	46
6.1.1.13	Diborane	46
6.1.1.14	Halohydroboranes	47
6.1.1.15	Oxyhydroboranes	50
6.1.1.15.1	Method 1: Hydroboration	50
6.1.1.15.2	Method 2: Reductions with Dioxaboranes	51
6.1.1.16	Catalytic Reactions of Oxyhydroboranes	52
6.1.1.16.1	Method 1: Replacement of Hydrogen or Halogen Atoms by Boron	52
6.1.1.16.1.1	Variation 1: Replacement of Hydrogen	52
6.1.1.16.1.2	Variation 2: Replacement of Halogen	56
6.1.1.16.2	Method 2: Catalytic Reductions with Asymmetric Oxazaborolidines	58
6.1.1.16.3	Method 3: Catalytic Reductions with Transition-Metal Catalysts	64
6.1.1.16.4	Method 4: Catalytic Asymmetric Hydroborations	64
6.1.1.16.4.1	Variation 1: By Rhodium and Iridium Catalysts	65
6.1.1.16.4.2	Variation 2: By Palladium, Cobalt, and Nickel Catalysts	68
6.1.1.16.4.3	Variation 3: By Lanthanide and Early Transition Metal Catalysts	69
6.1.1.16.5	Method 5: Catalytic Hydroboration of Alkynes	70
6.1.1.16.6	Method 6: Hydroboration of Vinylarenes	71
6.1.2	<b>Product Subclass 2: Borohydrides</b>	
	G. Chen	
6.1.2	<b>Product Subclass 2: Borohydrides</b>	81
	Synthesis of Product Subclass 2	82
6.1.2.1	Method 1: Preparation of Unsubstituted Borohydrides (Tetrahydroborates)	82
6.1.2.2	Method 2: Preparation of Cyanoborohydrides	83
6.1.2.3	Method 3: Preparation of Alkylborohydrides	83
6.1.2.4	Method 4: Preparation of Alkylalkoxy-, Trialkoxy-, and Acyloxyborohydrides	86
6.1.2.5	Method 5: Preparation of Alkylaminoborohydrides	89
6.1.2.5.1	Variation 1: Preparation of Monoalkylaminoborohydrides	89
6.1.2.5.2	Variation 2: Preparation of Bis- and Tris(pyrazolyl)borohydrides	90
	Applications of Product Subclass 2 in Organic Synthesis	90
6.1.2.6	Method 6: Reductive Cleavage of Carbon–Heteroatom Bonds	91
6.1.2.6.1	Variation 1: Reductive Cleavage of C–O Bonds	91
6.1.2.6.2	Variation 2: Reductive Cleavage of C–S Bonds	93
6.1.2.6.3	Variation 3: Reductive Cleavage of C–N Bonds	93
6.1.2.6.4	Variation 4: Reduction of Halides to Hydrocarbons	94
6.1.2.7	Method 7: Reductions of C=O Bonds	96

6.1.2.7.1	Variation 1:	Reduction of Aldehydes and Ketones to Hydrocarbons	96
6.1.2.7.2	Variation 2:	Reduction of Aldehydes and Ketones to Alcohols	97
6.1.2.7.3	Variation 3:	Diastereoselective Reduction of Ketones to Alcohols	98
6.1.2.7.4	Variation 4:	Enantioselective Reduction of Prochiral Ketones to Chiral Alcohols	100
6.1.2.7.5	Variation 5:	Reductions of Carboxylic Acids and Derivatives	101
6.1.2.8	Method 8:	Reductions of C=N Bonds	103
6.1.2.8.1	Variation 1:	Reduction of Imines and Derivatives	103
6.1.2.8.2	Variation 2:	Reductive Amination in Solution Phase	105
6.1.2.8.3	Variation 3:	Solid-Phase Reductive Amination	106
6.1.2.9	Method 9:	Reduction of Nitriles	107
6.1.2.10	Method 10:	Reduction of Azides	108
6.1.2.11	Method 11:	Reduction of Nitro Compounds	109

### 6.1.3 Product Subclass 3: Diborane(4) Compounds

T. B. Marder

6.1.3	<b>Product Subclass 3: Diborane(4) Compounds</b>	117	
	Synthesis of Product Subclass 3	117	
6.1.3.1	Method 1:	Reductive Coupling of Bis(dimethylamino)(halo)boranes	117
6.1.3.2	Method 2:	Reaction of Tetrakis(dimethylamino)diborane(4) with Alcohols and Thiols	118
6.1.3.2.1	Variation 1:	Reaction with Chiral 1,2-Diols	120
6.1.3.2.2	Variation 2:	Reaction with Thiols	120
	Applications of Product Subclass 3 in Organic Synthesis	121	
6.1.3.3	Method 3:	Oxidative Addition of the B—B Bond to Metal Centers	121
6.1.3.4	Method 4:	Catalyzed Diboration of $\alpha,\beta$ -Unsaturated Ketones	121
6.1.3.4.1	Variation 1:	Using ( $\eta^2$ -Ethene)bis(triphenylphosphine)platinum(0)	121
6.1.3.4.2	Variation 2:	Using Tetrakis(triphenylphosphine)platinum(0)	122
6.1.3.4.3	Variation 3:	Using Bis(phenylimino)acenaphthene(dimethylfumarate)-platinum(0)	123
6.1.3.4.4	Variation 4:	Using Copper(I) Trifluoromethanesulfonate/Tributylphosphine	123
6.1.3.4.5	Variation 5:	Using Stoichiometric Copper(I) Chloride/Lithium Chloride/Potassium Acetate	124
6.1.3.4.6	Variation 6:	Using Chlorotris(triphenylphosphine)rhodium(I)	125
6.1.3.5	Method 5:	Platinum-Catalyzed Diboration of Alkynes and Diynes	125
6.1.3.5.1	Variation 1:	Diboration of Alkynes Using Tetrakis(triphenylphosphine)-platinum(0)	125
6.1.3.5.2	Variation 2:	Diboration of Alkynes and Diynes Using ( $\eta^2$ -Ethene)bis(triphenylphosphine)platinum(0)	126
6.1.3.5.3	Variation 3:	Diboration of Alkynes Using Tris(norbornene)platinum/Diphenyl(2-tolyl)phosphine	128
6.1.3.6	Method 6:	Platinum- or Palladium-catalyzed Diboration of Dienes	129
6.1.3.6.1	Variation 1:	Tetrakis(triphenylphosphine)platinum(0)- and Bis(dibenzylideneacetone)platinum-Catalyzed Diboration of 1,3-Dienes	129

6.1.3.6.2	Variation 2:	Tetrakis(triphenylphosphine)platinum(0)- and Bis(dibenzylideneacetone)platinum-Catalyzed Diboration of 1,2-Dienes	130
6.1.3.6.3	Variation 3:	Catalyzed Diboration of 1,2-Dienes Using Bis(dibenzylideneacetone)palladium in the Presence of Organic Iodides	130
6.1.3.7	Method 7:	Catalyzed Diboration of Alkenes	130
6.1.3.7.1	Variation 1:	Using Phosphine-Free Platinum(0)	131
6.1.3.7.2	Variation 2:	Using Phosphine-Free Platinum(0) and Chiral Diborane(4)	133
6.1.3.7.3	Variation 3:	Using a Bis(diphenylphosphino)methane–Rhodium– $\eta^6$ -Bis(catecholato)borate Catalyst	134
6.1.3.7.4	Variation 4:	Rhodium-Catalyzed Asymmetric Diboration of Alkenes	135
6.1.3.7.5	Variation 5:	Diboration of Methylenecyclopropanes Using Tetrakis(triphenylphosphine)platinum(0) or Bis(dibenzylideneacetone)platinum	135
6.1.4	<b>Product Subclass 4: Metalloboranes</b>		
	H. Nöth		
6.1.4	<b>Product Subclass 4: Metalloboranes</b>		
	Synthesis of Product Subclass 4		
6.1.4.1	Method 1:	Synthesis of Silylboranes	140
6.1.4.1.1	Variation 1:	Substitution Reactions	140
6.1.4.1.2	Variation 2:	Insertion Reactions	144
6.1.4.1.3	Variation 3:	Co-dehalogenation Reactions	146
6.1.4.1.4	Variation 4:	Discharge Reactions	147
6.1.4.2	Method 2:	Synthesis of Germylboranes	147
6.1.4.3	Method 3:	Synthesis of Stannylboranes	149
6.1.4.4	Method 4:	Synthesis of Plumbylboranes	152
6.1.4.5	Method 5:	Synthesis of Silyl-, Germyl-, Stannyl-, and Plumbylborates and Related Compounds	152
6.1.4.5.1	Variation 1:	By Addition of a Borane to Metal Silanides or Stannanides	153
6.1.4.5.2	Variation 2:	Silyl-, Stannyl-, and Germylborates by Substitution Reactions	153
6.1.4.5.3	Variation 3:	B–Si Bond Formation via a Li–B Intermediate	155
	Applications of Product Subclass 4 in Organic Synthesis		
6.1.4.6	Method 6:	Sila- and Stannaboration with Silyl- and Stannylboranes	156
6.1.4.6.1	Variation 1:	Alkenes	156
6.1.4.6.2	Variation 2:	Allenes	159
6.1.4.6.3	Variation 3:	1,3-Dienes	161
6.1.4.6.4	Variation 4:	Reaction of 1-Boryl-4-silylbut-2-enes with Aldehydes	163
6.1.4.6.5	Variation 5:	Silylboration of Alkynes	166
6.1.4.6.6	Variation 6:	Stannaboration of Alkynes	170
6.1.4.7	Method 7:	Reaction of Alkynes with Silyl- and Stannylborates	171
6.1.4.8	Method 8:	Transition Metal Borations	173
6.1.4.9	Method 9:	Transition Metal Borides	174

<b>6.1.5</b>	<b>Product Subclass 5: Haloboranes</b>	
	D. S. Matteson	
<hr/>		
<b>6.1.5</b>	<b>Product Subclass 5: Haloboranes</b> .....	179
	Synthesis of Product Subclass 5 .....	180
<b>6.1.5.1</b>	Boron Trihalides .....	180
<b>6.1.5.1.1</b>	Method 1: Synthesis of Boron Trifluoride .....	180
<b>6.1.5.1.2</b>	Method 2: Synthesis of Boron Trifluoride–Diethyl Ether Complex .....	182
<b>6.1.5.1.3</b>	Method 3: Synthesis of Boron Trichloride .....	182
<b>6.1.5.1.4</b>	Method 4: Synthesis of Boron Tribromide .....	182
<b>6.1.5.1.5</b>	Method 5: Synthesis of Boron Triiodide .....	183
<b>6.1.5.2</b>	Halo(oxy)boranes .....	183
<b>6.1.5.2.1</b>	Method 1: Synthesis of Halo(dioxy)- and Dihalo(oxy)boranes .....	183
<b>6.1.5.2.1.1</b>	Variation 1: Synthesis of Alkoxy(chloro)boranes .....	184
<b>6.1.5.2.2</b>	Method 2: Synthesis of Alkyl- and Aryl(halo)(oxy)boranes .....	184
<b>6.1.5.2.2.1</b>	Variation 1: From Alkoxy Metals .....	184
<b>6.1.5.2.2.2</b>	Variation 2: By Ligand Exchange between Two Boron Components .....	186
<b>6.1.5.3</b>	Amino(halo)boranes .....	186
<b>6.1.5.3.1</b>	Method 1: Synthesis of Amino(dihalo)boranes and Diamino(halo)boranes .....	186
<b>6.1.5.3.1.1</b>	Variation 1: Synthesis of Amino(dihalo)boranes .....	187
<b>6.1.5.3.1.2</b>	Variation 2: Synthesis of Diamino(halo)boranes .....	188
<b>6.1.5.3.2</b>	Method 2: Synthesis of Alkyl- and Aryl(amino)(halo)boranes and Related Compounds .....	190
<b>6.1.5.3.2.1</b>	Variation 1: Synthesis of Diamino(chloro)boronium Chlorides .....	191
<b>6.1.5.4</b>	Alkyl- and Aryl(halo)boranes .....	193
<b>6.1.5.4.1</b>	Method 1: Synthesis of Alkyl- and Aryl(fluoro)boranes .....	193
<b>6.1.5.4.2</b>	Method 2: Synthesis of Alkyl- and Aryl(chloro)boranes .....	194
<b>6.1.5.4.2.1</b>	Variation 1: Hydroboration of Alkenes .....	195
<b>6.1.5.4.2.2</b>	Variation 2: By Conversion of B–H Bonds into B–Cl Bonds .....	200
<b>6.1.5.4.2.3</b>	Variation 3: By Replacement of B–Cl Bonds by B–C Bonds .....	201
<b>6.1.5.4.2.4</b>	Variation 4: By Addition to Alkynes .....	201
<b>6.1.5.4.2.5</b>	Variation 5: By Metal Replacement .....	202
<b>6.1.5.4.2.6</b>	Variation 6: By Conversion of B–O Bonds into B–Cl Bonds .....	206
<b>6.1.5.4.2.7</b>	Variation 7: By Conversion of B–F Bonds into B–Cl Bonds .....	207
<b>6.1.5.4.3</b>	Method 3: Synthesis of Alkyl- and Aryl(bromo)boranes and Alkyl- and Aryl(iodo)boranes .....	207
<b>6.1.5.4.3.1</b>	Variation 1: From Alkenes .....	207
<b>6.1.5.4.3.2</b>	Variation 2: From Acetylenes .....	208
<b>6.1.5.4.3.3</b>	Variation 3: Using Organometallic Reagents .....	210
	Applications of Product Subclass 5 in Organic Synthesis .....	211
<b>6.1.5.5</b>	Boron Trifluoride .....	211
<b>6.1.5.5.1</b>	Method 1: Aldol–Groß Reaction .....	212
<b>6.1.5.5.2</b>	Method 2: Friedel–Crafts Reactions .....	212

6.1.5.6	Boron Trifluoride–Diethyl Ether Complex and Its Derivatives	214
6.1.5.6.1	Method 1: Reductions of Epoxides	214
6.1.5.6.2	Method 2: Complexes with Organocopper Compounds	215
6.1.5.6.3	Method 3: Organolithium Compounds	217
6.1.5.6.4	Method 4: Boron Trifluoride–Acetic Acid Complex	218
6.1.5.6.5	Method 5: Difluoroboryl Methanesulfonate	218
6.1.5.7	Boron Trichloride	219
6.1.5.7.1	Method 1: Detritylation	219
6.1.5.7.2	Method 2: Condensation of a Ketone with a Silylated Enediol	220
6.1.5.7.3	Method 3: Reactions Involving Aldehydes	220
6.1.5.7.3.1	Variation 1: Conversion of Aromatic Aldehydes into Aryl(dichloro)methanes	220
6.1.5.7.3.2	Variation 2: Condensation of Aromatic Aldehydes with Styrenes	221
6.1.5.7.3.3	Variation 3: Condensation of Aromatic Aldehydes with Arylacetylenes	221
6.1.5.7.4	Method 4: Diels–Alder Reactions	222
6.1.5.8	Boron Tribromide	222
6.1.5.8.1	Method 1: Cleavage of C–O Bonds	223
6.1.5.8.2	Method 2: Boron Demetalations	223
6.1.5.9	Boron Triiodide	224
6.1.5.10	Boron Triiodide– <i>N,N</i> -Diethylaniline Complex	224
6.1.5.11	Halo(oxy)boranes	225
6.1.5.11.1	Method 1: Reaction with Allyllithiums Followed by Alcohols or Aldehydes	225
6.1.5.11.2	Method 2: Alkenylation by Replacement of Zirconium	227
6.1.5.12	Amino(halo)boranes	227
6.1.5.12.1	Method 1: Preparation of Boron Heterocycles Using Amino(dihalo)boranes	227
6.1.5.12.2	Method 2: Using Diamino(halo)boranes	229
6.1.5.13	Alkyl- and Aryl(chloro)boranes	231
6.1.5.13.1	Method 1: Secondary Amine Formation Using Alkyl(chloro)boranes	232
6.1.5.13.2	Method 2: Reduction of Ketones to Alcohols	233
6.1.5.13.3	Method 3: Formation of Enolates from Ketones	238
6.1.5.13.4	Methods 4: Miscellaneous Applications	238
6.1.5.14	Alkyl- and Aryl(bromo)boranes and Alkyl- and Aryl(iodo)boranes	240
6.1.6	<b>Product Subclass 6: Haloborates</b> B. Schilling and D. E. Kaufmann	
6.1.6	<b>Product Subclass 6: Haloborates</b>	247
	Synthesis of Product Subclass 6	247
6.1.6.1	Method 1: Destannylation of Organostannanes	247
6.1.6.2	Method 2: Fluorination of Organoboronic Acids and Esters	247
6.1.6.3	Method 3: Fluorination of Intermediate Organoboronic Acids and Esters	248

6.1.6.3.1	Variation 1: From Organolithium and Grignard Reagents	248
6.1.6.3.2	Variation 2: From Alkynes	248
	Applications of Product Subclass 6 in Organic Synthesis	249
6.1.6.4	Method 4: Cross-Coupling Reactions of Potassium Aryltrifluoroborates	249
6.1.6.4.1	Variation 1: Addition to Aldehydes and Enones	249
6.1.6.4.2	Variation 2: With Arenediazonium Tetrafluoroborates	250
6.1.6.4.3	Variation 3: With Diaryliodonium Salts	251
6.1.6.5	Method 5: Substitution Using Inorganic Tetrahaloborates	251
6.1.6.5.1	Variation 1: Nucleophilic Substitution Reactions	251
6.1.6.5.2	Variation 2: Regioselective Fluorination Using Selectfluor	252
6.1.6.6	Method 6: Release of Difluoro(organo)boranes from Potassium Trifluoro(organo)borates	253
6.1.6.7	Method 7: Addition of Potassium Allyltrifluoroborates to Aldehydes and Ketones	253
6.1.6.8	Method 8: Addition Reactions Using Inorganic Tetrahaloborates (The Balz–Schiemann Reaction)	254
6.1.7	<b>Product Subclass 7: Hydroxyboranes</b> N. Miyaura	
6.1.7	<b>Product Subclass 7: Hydroxyboranes</b>	257
	Synthesis of Product Subclass 7	257
6.1.7.1	Method 1: Direct Borylation of Alkanes and Arenes	257
6.1.7.2	Method 2: Transmetalation	260
6.1.7.2.1	Variation 1: Via Magnesium and Lithium Reagents	263
6.1.7.2.2	Variation 2: Via Other Metal Reagents	266
6.1.7.3	Method 3: Borylation of Aryl, Vinyl, and Allyl Halides	267
6.1.7.3.1	Variation 1: By Palladium-Catalyzed Coupling of Diboranes	268
6.1.7.3.2	Variation 2: By Palladium-Catalyzed Coupling of 1,3,2-Dioxaborolanes	271
6.1.7.4	Method 4: Hydroboration of Alkenes and Alkynes	272
6.1.7.4.1	Variation 1: Uncatalyzed Hydroboration	273
6.1.7.4.2	Variation 2: Catalyzed Hydroboration	275
6.1.7.5	Method 5: Diboration of Alkenes and Alkynes	279
6.1.7.5.1	Variation 1: Uncatalyzed Diboration	279
6.1.7.5.2	Variation 2: Catalyzed Diboration	280
6.1.7.6	Methods 6: Additional Methods	281
	Applications of Product Subclass 7 in Organic Synthesis	285
6.1.7.7	Method 7: Formation of Diol Esters	285
6.1.7.7.1	Variation 1: Protection, Chromatographic Separations, and Analysis of Diols	285
6.1.7.7.2	Variation 2: Recognition of Sugar Molecules	286
6.1.7.8	Method 8: Use as Catalysts	287
6.1.7.8.1	Variation 1: For Hydroxyalkylation of Phenols	287
6.1.7.8.2	Variation 2: For Hydroalumination	288
6.1.7.8.3	Variation 3: For the Substitution of Epoxides	289
6.1.7.8.4	Variation 4: For Amidation of Carboxylic Acids	290

6.1.7.9	Method 9:	C—C Bond Formation via the Boron-Mannich Reaction	291
6.1.7.10	Method 10:	Metal-Catalyzed C—C and Carbon—Heteroatom Bond Formation	292
6.1.7.10.1	Variation 1:	Palladium- and Nickel-Catalyzed Cross-Coupling Reactions	292
6.1.7.10.2	Variation 2:	Rhodium-Catalyzed Addition Reactions	294
6.1.7.10.3	Variation 3:	Copper-Catalyzed C—O, C—S, and C—N Bond Formation	296
6.1.8	<b>Product Subclass 8: Boroxanes</b>		
	M. Periasamy, M. Seenivasaperumal, and S. Sivakumar		
6.1.8	<b>Product Subclass 8: Boroxanes</b>		
	Synthesis of Product Subclass 8		
6.1.8.1	Method 1:	Boroxin from Diborane	301
6.1.8.2	Method 2:	Alkoxyboroxins from Boric Acids	301
6.1.8.3	Method 3:	Alkylboroxin from the Corresponding Boronic Acid	302
6.1.8.3.1	Variation 1:	An Alkylboroxin by Carbonylation of Borane–Dimethyl Sulfide Complex	303
6.1.8.3.2	Variation 2:	Alkylboroxins from Organoboranes and Boric Oxide	304
6.1.8.4	Method 4:	Arylboroxins from Arylboronic Acids	304
6.1.8.5	Method 5:	A Diboroxane from Boric Acid	306
6.1.8.6	Method 6:	Diboroxanes from Hydroxyboranes or Derivatives	306
6.1.8.7	Method 7:	A Diboroxane from a Borepin	307
6.1.8.8	Method 8:	2,4,6-Trivinylboroxin–Pyridine from Trimethyl Borate	307
	Applications of Product Subclass 8 in Organic Synthesis		
6.1.8.9	Method 9:	Oxidation of Alkoxyboroxins	308
6.1.8.10	Method 10:	Boroxins in a Suzuki-Type Cross-Coupling Reaction	310
6.1.8.10.1	Variation 1:	Preparation of 3,4-Disubstituted Furans	310
6.1.8.10.2	Variation 2:	Preparation of Oligomeric Furans	310
6.1.8.10.3	Variation 3:	Preparation of Substituted Styrenes	311
6.1.8.11	Method 11:	Arylboroxins as Catalysts for Aldol or Michael Reactions	312
6.1.8.12	Method 12:	Rhodium-Catalyzed Hydroarylation of Alkenes and Alkynes by Triarylboroxins	313
6.1.8.13	Method 13:	Preparation of Chiral Oxazaborolidine Catalysts	314
6.1.8.14	Method 14:	Separation of Diols	315
6.1.8.15	Method 15:	Boroxin-Containing Polymers	315
6.1.8.16	Method 16:	High Performance Polymer Electrolytes	316
6.1.8.17	Method 17:	Resolution of 1,1'-Bi-2-naphthol	318
6.1.9	<b>Product Subclass 9: Acyloxyboranes</b>		
	M. Periasamy, M. N. Reddy, and N. S. Kumar		
6.1.9	<b>Product Subclass 9: Acyloxyboranes</b>		
	Synthesis of Product Subclass 9		
6.1.9.1	Method 1:	Triacyloxyboranes and Oxybis(diacyloxy)boranes	322

6.1.9.2	Method 2:	By the Reaction of 9-Borabicyclo[3.3.1]nonane with Carboxylic Acids	323
		Applications of Product Subclass 9 in Organic Synthesis	323
6.1.9.3	Method 3:	In Electrophilic Reactions	323
6.1.9.4	Method 4:	Acyloxyborohydrides in Reduction Reactions	324
6.1.9.4.1	Variation 1:	Reduction of Carboxylic Acids	324
6.1.9.4.2	Variation 2:	Selective Reduction of the Carboxylic Acid Group in an Alkenic Acid	325
6.1.9.4.3	Variation 3:	Hydroboration of Alkenes	326
6.1.9.4.4	Variation 4:	Selective Hydroboration of Alkenic Acids	326
6.1.9.5	Method 5:	Reduction of Carboxylic Acids to Aldehydes	327
6.1.9.6	Method 6:	Asymmetric Reactions with Tartaric Acid Based Chiral Acyloxyboranes	328
6.1.9.6.1	Variation 1:	Asymmetric Reduction	328
6.1.9.6.2	Variation 2:	Diels–Alder Reactions	328
6.1.9.6.3	Variation 3:	Aldol Reactions	330
6.1.9.6.4	Variation 4:	Asymmetric Allylation	331
6.1.9.7	Method 7:	Asymmetric Reactions with Amino Acid Based Chiral Acyloxyboranes	332
6.1.9.7.1	Variation 1:	Diels–Alder Reactions	332
6.1.9.7.2	Variation 2:	Aldol Reactions	333
6.1.10	<b>Product Subclass 10: Vinyloxyboranes</b>		
	C. Gennari, S. Ceccarelli, and U. Piarulli		
6.1.10	<b>Product Subclass 10: Vinyloxyboranes</b>		337
	Synthesis of Product Subclass 10		339
6.1.10.1	Method 1:	From Carbonyl Compounds by Direct Enolization	340
6.1.10.1.1	Variation 1:	Synthesis of <i>Z</i> ( <i>O</i> )-Vinyloxyboranes	348
6.1.10.1.2	Variation 2:	Synthesis of <i>E</i> ( <i>O</i> )-Vinyloxyboranes	348
6.1.10.1.3	Variation 3:	Synthesis of Vinyloxyboranes by Enolization of Aldehydes	348
6.1.10.2	Method 2:	From Silyl Enol Ethers or Lithium Enolates	349
6.1.10.2.1	Variation 1:	From Silyl Enol Ethers	349
6.1.10.2.2	Variation 2:	From Lithium Enolates	350
6.1.10.3	Method 3:	By Addition of Trialkyl- and Dialkylboranes to Double Bonds	351
6.1.10.3.1	Variation 1:	By Addition to $\alpha,\beta$ -Unsaturated Carbonyl Compounds	351
6.1.10.3.2	Variation 2:	By Addition to Ketenes	352
6.1.10.4	Method 4:	Synthesis of Dialkyl Vinyl Borates by Oxidation of Dialkyl Vinylboronates	353
6.1.10.4.1	Variation 1:	From Vinylic Grignard Reagents	353
6.1.10.4.2	Variation 2:	By Hydroboration of Alkynes	354
6.1.10.5	Method 5:	By Rearrangement of Boron “Ate” Complexes	355
6.1.10.5.1	Variation 1:	From $\alpha$ -Halo-Substituted Enolates	356
6.1.10.5.2	Variation 2:	From $\alpha$ -Diazo Carbonyl Compounds	357
6.1.10.5.3	Variation 3:	From Stabilized Sulfur Ylides	358
6.1.10.6	Methods 6:	Additional Methods	358

	Applications of Product Subclass 10 in Organic Synthesis	359
6.1.10.7	Method 7: Synthesis of $\alpha$ -Halo Carbonyl Compounds by Halogenation of Vinyloxyboranes	359
6.1.10.8	Method 8: Synthesis of <i>syn</i> - $\alpha$ -Substituted $\beta$ -Hydroxy Carbonyl Compounds by the Aldol Reaction	360
6.1.10.8.1	Variation 1: From Imide-Derived Vinyloxyboranes	367
6.1.10.8.2	Variation 2: From Sultam-Derived Vinyloxyboranes	369
6.1.10.8.3	Variation 3: From Ester-Derived Vinyloxyboranes	370
6.1.10.8.4	Variation 4: From Diisopinocampheyl(vinyloxy)boranes	371
6.1.10.8.5	Variation 5: From Vinyloxydiazaborolidines	372
6.1.10.8.6	Variation 6: From Dialkyl Vinyl Borates	373
6.1.10.8.7	Variation 7: From Monohalo- and Dihalo(vinyloxy)boranes	374
6.1.10.9	Method 9: Synthesis of <i>anti</i> - $\alpha$ -Substituted $\beta$ -Hydroxy Carbonyl Compounds by the Aldol Reaction	375
6.1.10.9.1	Variation 1: From Imide-Derived Vinyloxyboranes with Excess Dibutyl[[(trifluoromethyl)sulfonyl]oxy]borane	380
6.1.10.9.2	Variation 2: From Sultam-Derived Vinyloxyboranes in the Presence of Lewis Acids	381
6.1.10.9.3	Variation 3: From Ester-Derived Vinyloxyboranes	382
6.1.10.9.4	Variation 4: From Vinyloxyboranes Bearing Menthone-Derived Chiral Ligands	383
6.1.10.9.5	Variation 5: From Vinyloxydiazaborolidines	385
6.1.10.9.6	Variation 6: Miscellaneous Reactions	386
6.1.10.10	Method 10: Synthesis of $\alpha$ -Unsubstituted $\beta$ -Hydroxy Carbonyl Compounds by the Aldol Reaction	386
6.1.10.10.1	Variation 1: From 2,5-Dialkyl-1-(vinyloxy)borolanes	388
6.1.10.10.2	Variation 2: From Vinyloxyboranes Bearing Menthone-Derived Chiral Ligands	389
6.1.10.10.3	Variation 3: Miscellaneous Reactions	390
6.1.10.11	Method 11: Synthesis of $\beta$ -Amino Carbonyl Compounds by Reaction with Imines	391
6.1.10.12	Method 12: Alkylation of Vinyloxyboranes (The Nicholas-Schreiber Reaction)	393
6.1.10.13	Method 13: Pericyclic Reactions	395
6.1.10.13.1	Variation 1: [3,3]-Sigmatropic Rearrangements	395
6.1.10.13.2	Variation 2: [2,3]-Sigmatropic Rearrangements	396
6.1.11	<b>Product Subclass 11: Aryloxy- and Alkoxyboranes (Including Protecting Groups)</b> K. Ishihara and H. Yamamoto	
6.1.11	<b>Product Subclass 11: Aryloxy- and Alkoxyboranes (Including Protecting Groups)</b>	403
	Synthesis of Product Subclass 11	404
6.1.11.1	Method 1: Synthesis by Substitution	404
6.1.11.1.1	Variation 1: Of Boric Oxide or Hydroxyboranes with Alcohols	404

6.1.11.1.2	Variation 2:	Of Borohydrides with Alcohols	405
6.1.11.1.3	Variation 3:	Of Alkylboranes with Alcohols or Alkoxyboranes	406
6.1.11.1.4	Variation 4:	Of Acyloxyboranes with Alcohols	406
6.1.11.1.5	Variation 5:	Of Haloboranes with Alcohols	407
6.1.11.1.6	Variation 6:	Of Thioboranes with Alcohols	408
6.1.11.1.7	Variation 7:	Of Aminoboranes with Alcohols	408
6.1.11.2	Method 2:	Synthesis by Addition Reactions	409
6.1.11.2.1	Variation 1:	Oxidation of Alkylboranes with Peroxy Acids	409
6.1.11.2.2	Variation 2:	Oxidation of Alkylboranes with Amine <i>N</i> -Oxides	409
6.1.11.2.3	Variation 3:	Oxidation of Alkylboranes with Molybdenum Peroxide–Pyridine–Hexamethylphosphoric Triamide	410
6.1.11.2.4	Variation 4:	Oxidation of Alkylboranes with Molecular Oxygen	411
6.1.11.2.5	Variation 5:	Reduction of Carbonyl Compounds with Hydroboranes	412
6.1.11.2.6	Variation 6:	Alkylation of Carbonyl Compounds with Allenylboronic Esters	413
6.1.11.2.7	Variation 7:	Alkylation of Carbonyl Compounds with Trialkylboranes	413
6.1.11.3	Method 3:	Transesterification of Alkoxyboranes with Alcohols	414
		Applications of Product Subclass 11 in Organic Synthesis	414
6.1.11.4	Method 4:	Synthesis of Esters by Esterification of Carboxylic Acids with Alkoxyboranes	414
6.1.11.5	Method 5:	The Protection of Hydroxy Groups	415
6.1.11.6	Method 6:	Synthesis of Boronic Acids and Esters	415
6.1.11.6.1	Variation 1:	Reduction	416
6.1.11.6.2	Variation 2:	Electrophilic Reagent	416
6.1.11.6.3	Variation 3:	Synthesis of $\alpha,\beta$ -Unsaturated Nitriles	417
6.1.11.6.4	Variation 4:	Synthesis of Esters	417
6.1.11.6.5	Variation 5:	Preparation of Potassium Triisopropylborohydride	418
6.1.11.7	Method 7:	Use as a Lewis Acid Promoter or Catalyst	418
6.1.12	<b>Product Subclass 12: Aryloxy- and Alkoxyborates</b>		
	K. Ishihara and H. Yamamoto		
6.1.12	<b>Product Subclass 12: Aryloxy- and Alkoxyborates</b>		423
	Synthesis of Product Subclass 12		423
6.1.12.1	Method 1:	By Reduction of Aldehydes or Ketones with Sodium Borohydride	423
6.1.12.2	Method 2:	By Reaction of Alcohols with Sodium Borohydride	424
6.1.12.3	Method 3:	Synthesis of Ammonium Tetraalkoxyborates and Related Compounds	424
	Applications of Product Subclass 12 in Organic Synthesis		425
6.1.12.4	Method 4:	Use as Brønsted Acid Assisted Chiral Lewis Acids	425

6.1.16.1.2	Variation 2:	From Amino(halo)boranes .....	488
6.1.16.2	Method 2:	Phosphinoboranes by Elimination from Phosphine–Borane Complexes .....	489
6.1.16.2.1	Variation 1:	By Dehydrohalogenation .....	490
6.1.16.2.2	Variation 2:	By Thermal Dehydrogenation .....	490
6.1.16.2.3	Variation 3:	By Elimination of Trimethylsilyl Groups .....	491
6.1.16.3	Method 3:	By Catalytic Organometallic Dehydrocoupling .....	492
6.1.16.4	Method 4:	Borane–Phosphine Complexes by Complexation of an Organoborane .....	493
6.1.16.4.1	Variation 1:	From Phosphines and Uncomplexed Boranes .....	493
6.1.16.4.2	Variation 2:	From Phosphines and Borane Complexes .....	494
6.1.16.4.3	Variation 3:	From Chlorophosphines .....	495
6.1.16.4.4	Variation 4:	From Borohydrides and Free Phosphines .....	496
6.1.16.4.5	Variation 5:	From Phosphine Oxides .....	497
6.1.16.5	Method 5:	Borane–Phosphine Complexes by Halogenation of Borane Complexes .....	497
6.1.16.6	Method 6:	Additional Methods for the Synthesis of Borane–Phosphine Complexes .....	498
		Applications of Product Subclass 16 in Organic Synthesis .....	498
6.1.16.7	Method 7:	Borane as a Phosphorus Protecting Group .....	499
6.1.16.8	Method 8:	Alkylation of Borane–Phosphine Complexes .....	500
6.1.16.8.1	Variation 1:	C-Alkylation Reactions .....	500
6.1.16.8.2	Variation 2:	P-Alkylation Reactions .....	501
6.1.16.8.3	Variation 3:	Nucleophilic Substitution Reactions .....	503
6.1.16.9	Method 9:	Hydrophosphination Reactions .....	504
6.1.16.10	Method 10:	Coupling Reactions .....	505
6.1.16.10.1	Variation 1:	Copper-Promoted Oxidative Coupling .....	505
6.1.16.10.2	Variation 2:	Palladium-Promoted Cross Coupling .....	506
6.1.16.11	Methods 11:	Miscellaneous Applications .....	507
6.1.17	<b>Product Subclass 17: <math>\alpha</math>-Metalloalkylboranes</b> Bakthan Singaram		
6.1.17	<b>Product Subclass 17: <math>\alpha</math>-Metalloalkylboranes</b> .....		513
	Synthesis of Product Subclass 17 .....		514
6.1.17.1	Method 1:	Preparation of $\alpha$ -Borylboranes and $\alpha$ -Borylboronates .....	514
6.1.17.1.1	Variation 1:	Hydroboration of Alkynes .....	514
6.1.17.1.2	Variation 2:	Preparation of Bis-, Tri-, and Tetrakis(dimethoxyboryl)- methanes .....	514
6.1.17.2	Method 2:	Metallation of Di-, Tri-, and Tetraborylmethanes by Deboronation .....	517
6.1.17.2.1	Variation 1:	With Grignard Reagents .....	518
6.1.17.2.2	Variation 2:	From <i>gem</i> -Tris- and Tetrakis(dialkoxyboryl) Compounds .....	519
6.1.17.3	Method 3:	Deprotonation of $\alpha$ -Substituted Boranes and Boronates .....	519

6.1.17.3.1	Variation 1:	Of Bis(dialkoxyboryl)methanes .....	520
6.1.17.3.2	Variation 2:	Of $\alpha$ -(Phenylsulfanyl)methylboronates .....	521
6.1.17.3.3	Variation 3:	Of $\alpha$ -(Trimethylsilyl)methylboronates .....	521
6.1.17.3.4	Variation 4:	Of Dialkylvinylboranes .....	522
6.1.17.4	Method 4:	Metal–Halogen Exchange Reactions of $\alpha$ -Haloalkylboranes and $\alpha$ -Haloalkylboronates .....	523
6.1.17.4.1	Variation 1:	Preparation of $\alpha$ -(Trialkylstannyl)alkylboranes and $\alpha$ -(Trialkylstannyl)alkylboronates .....	523
6.1.17.4.2	Variation 2:	Reaction of an $\alpha$ -Haloalkylboronate with <i>tert</i> -Butyllithium ...	523
6.1.17.4.3	Variation 3:	Reaction of $\alpha$ -Haloalkylboronates with Zinc Metal and Subsequent Reaction with Copper(I) Cyanide .....	524
6.1.17.4.4	Variation 4:	Reaction of $\alpha$ -Haloalkylboronates with Chromium(II) Chloride	524
6.1.17.5	Method 5:	Deprotonation of Alkyl(dimesityl)boranes with Lithium Dialkylamides .....	525
6.1.17.6	Method 6:	Deprotonation of Alkyl(dimesityl)boranes with Mesityllithium	525
6.1.17.7	Method 7:	Generation of $\alpha$ -Metalloalkylboranes by Organometallic Addition to Alkenylboranes .....	526
6.1.17.8	Method 8:	Generation of $\alpha$ -Metalloalkenylboranes .....	527
		Applications of Product Subclass 17 in Organic Synthesis .....	528
6.1.17.9	Method 9:	Alkylation of $\alpha$ -Metalloalkylboranes .....	528
6.1.17.10	Method 10:	Synthesis of Alkenes .....	530
6.1.17.10.1	Variation 1:	Synthesis of Allenes .....	532
6.1.17.10.2	Variation 2:	Synthesis of Vinylboronates .....	532
6.1.17.11	Method 11:	Preparation of Carbonyl Compounds .....	533
6.1.17.12	Method 12:	Preparation of 1,2-Diols .....	534
6.1.17.13	Method 13:	Preparation of 1,3-Diols .....	535
6.1.17.14	Method 14:	Synthesis of Alcohols .....	537
6.1.17.15	Method 15:	Preparation of Amino Alcohols .....	538
6.1.18	<b>Product Subclass 18: Cyanoboranes</b>		
	D. Gabel and M. B. El-Zaria		
6.1.18	<b>Product Subclass 18: Cyanoboranes</b> .....		541
	Synthesis of Product Subclass 18 .....		542
6.1.18.1	Method 1:	Cyanoborane–Amine Complexes by Substitution of Hydrogen in Borane–Amine Complexes .....	542
6.1.18.2	Method 2:	Dicyanoborane–Amine Complexes by Substitution of Hydrogen in Cyanoborane .....	543
6.1.18.3	Method 3:	From Borohydrides and Mercury(II) Cyanide .....	544
6.1.18.4	Method 4:	Cyanoboranes by Substitution of the Carboxamide Group in Carbamoylboranes .....	545
6.1.18.5	Method 5:	Cyanoboranes by Substitution of Halides in Haloboranes ...	545
6.1.18.5.1	Variation 1:	By Cyanogen Iodide .....	546
6.1.18.5.2	Variation 2:	By Trimethylsilyl Cyanide .....	546
6.1.18.5.3	Variation 3:	By Cyanide .....	546
6.1.18.5.4	Variation 4:	By Isocyanoboranes .....	548

6.1.18.6	Method 6:	Trialkylcyanoborates by Complexation of Trialkylboranes with Cyanide .....	549
6.1.18.7	Method 7:	Chelation of Potassium Cyanide by Boronates Containing Crown Ether Ligands .....	551
6.1.18.8	Method 8:	Monomeric Cyanoborane–Amine Complexes from Amines and Oligomeric Cyanoborane .....	552
6.1.18.9	Method 9:	Cyanoborane Complexes from Sodium Cyanoborohydride ...	553
6.1.18.9.1	Variation 1:	By Reaction with Amine Hydrochlorides To Give Cyanoborane–Amine Complexes .....	553
6.1.18.9.2	Variation 2:	By Reaction with Phosphines To Give Cyanoborane–Phosphine Complexes .....	554
6.1.18.9.3	Variation 3:	By Reaction with Halogens To Give Oligomeric Cyanoborane	555
6.1.18.10	Method 10:	B-Alkylation of Cyanoboranes .....	555
6.1.18.11	Method 11:	Exchange of the Donor Ligands of Cyanoborane–Amine, –Phosphine, –Phosphite, and –Dimethyl Sulfide Complexes .	556
		Applications of Product Subclass 18 in Organic Synthesis .....	558
6.1.18.12	Method 12:	Ethylation of Cyanoboranes To Give <i>N</i> -Ethyltriliumborane Salts .....	558
6.1.18.13	Method 13:	Preparation of Ketones .....	559
6.1.18.14	Method 14:	Formation of Clathrates .....	560
6.1.18.15	Method 15:	Reduction of Ketones .....	560
6.1.18.16	Method 16:	Preparation of Alkyl Cyanides .....	560
6.1.19	<b>Product Subclass 19: Carboxyboranes and Related Derivatives</b>		
	D. Gabel and M. B. El-Zaria		
6.1.19	<b>Product Subclass 19: Carboxyboranes and Related Derivatives</b> .....		563
	Synthesis of Product Subclass 19 .....		564
6.1.19.1	Method 1:	From Cyanoboranes .....	564
6.1.19.1.1	Variation 1:	Carboxy-, Carbamoyl-, and (Alkoxy carbonyl)boranes from Cyanoboranes .....	565
6.1.19.1.2	Variation 2:	[(Alkylimino)(alkoxy)methyl]boranes from Cyanoboranes ...	568
6.1.19.1.3	Variation 3:	Sulfur and Nitrogen Analogues of Carboxy- and Carbamoylboranes from Cyanoboranes .....	569
6.1.19.2	Method 2:	Carbamoylboranes from Carboxyboranes .....	570
6.1.19.3	Method 3:	(Alkoxy carbonyl)boranes from Carboxyboranes .....	573
6.1.19.3.1	Variation 1:	Acid-Catalyzed Esterification of Carboxyboranes .....	573
6.1.19.3.2	Variation 2:	Esterification of Carboxyboranes in the Presence of Activating Agents .....	573
6.1.19.3.3	Variation 3:	Esterification of Carboxyboranes under Basic Conditions ...	574
6.1.19.4	Method 4:	(Alkoxy carbonyl)boranes from Carbamoylboranes .....	575
6.1.19.5	Method 5:	Carbamoylborane from the Carbonyl–Borane Adduct .....	576
6.1.19.6	Method 6:	Carboxy- and Carbamoylboranes from Haloboranes .....	577
6.1.19.7	Method 7:	Exchange of the Donor Ligands of Borane Adducts .....	578
6.1.19.8	Method 8:	Ligand-Exchange Reactions of (Methoxy carbonyl)borane–Amines .....	579

	Applications of Product Subclass 19 in Organic Synthesis .....	580
6.1.19.9	Method 9: Alkylboranes by Reduction of Carboxyboranes .....	580
6.1.19.10	Method 10: Haloboranes from Carboxyboranes .....	581
6.1.20	<b>Product Subclass 20: <math>\alpha</math>-Haloalkylboronates</b> D. S. Matteson	
<hr/>		
6.1.20	<b>Product Subclass 20: <math>\alpha</math>-Haloalkylboronates</b> .....	585
	Synthesis of Product Subclass 20 .....	585
6.1.20.1	Method 1: Synthesis via (Dihalomethyl)borate Anions .....	585
6.1.20.1.1	Variation 1: Boronates with Preformed (Dichloromethyl)lithium .....	592
6.1.20.1.2	Variation 2: From (Dihalomethyl)lithiums Generated In Situ .....	593
6.1.20.1.3	Variation 3: From (Dihalomethyl)boronates and Organometallic Reagents	595
6.1.20.1.4	Variation 4: From Achiral Boronates with an Asymmetric Catalyst .....	596
6.1.20.2	Method 2: From Haloalkyllithiums and Trialkyl Borates .....	597
6.1.20.3	Method 3: $\alpha$ -Substitution Routes .....	599
6.1.20.3.1	Variation 1: Halogenation of Alkylboronates .....	599
6.1.20.3.2	Variation 2: From $\alpha$ -Metalloalkylboronates .....	600
6.1.20.3.3	Variation 3: Via Nucleophilic Displacements .....	601
6.1.20.4	Method 4: Addition of Halogen Compounds to Alkenylboranes .....	601
6.1.20.4.1	Variation 1: Addition of Hydrogen Halides .....	601
6.1.20.4.2	Variation 2: Radical Additions of Halocarbons .....	602
6.1.20.4.3	Variation 3: Halogenations .....	602
6.1.20.5	Methods 5: Additional Methods .....	602
6.1.21	<b>Product Subclass 21: <math>\alpha</math>-Alkoxyalkyl-, <math>\alpha</math>-Sulfanylalkyl-, and <math>\alpha</math>-Aminoalkylboronates</b> D. S. Matteson

	Synthesis of Product Subclass 21 .....	608
6.1.21.1	Method 1: Synthesis from $\alpha$ -Haloalkylboronates .....	608
6.1.21.1.1	Variation 1: Alkoxide Substitutions .....	609
6.1.21.1.2	Variation 2: Synthesis of $\alpha$ -Aminoalkyl- and $\alpha$ -Amidoalkylboronates .....	615
6.1.21.1.3	Variation 3: Azide Substitution .....	617
6.1.21.1.4	Variation 4: Thiolate Substitution .....	618
6.1.21.2	Method 2: Synthesis from $\alpha$ -Lithio Ethers and Sulfides .....	619
6.1.21.2.1	Variation 1: From (Diethoxymethyl)lithium and Boronates .....	619
6.1.21.2.2	Variation 2: From [(Phenylsulfanyl)methyl]lithium and Trimethyl Borate	620
6.1.21.2.3	Variation 3: Alkylation of Lithiated [ $\alpha$ -(Phenylsulfanyl)alkyl]boronates	621
6.1.21.3	Methods 3: Additional Methods .....	621

6.1.22	<b>Product Subclass 22: <math>\alpha</math>-Phosphinoalkylboranes</b> D. S. Matteson	
<hr/>		
6.1.22	<b>Product Subclass 22: <math>\alpha</math>-Phosphinoalkylboranes</b> .....	623
	Synthesis of Product Subclass 22 .....	623
6.1.22.1	Method 1: Addition of Boranes to Alkylidene phosphoranes .....	623
6.1.22.1.1	Variation 1: Addition of Hydroboranes .....	623
6.1.22.1.2	Variation 2: Addition of Haloboranes .....	625
6.1.22.1.3	Variation 3: Addition of Triorganoboranes .....	628
6.1.22.2	Method 2: Reaction of $\alpha$ -Haloalkylboranes with Phosphines .....	629
6.1.22.3	Methods 3: Other Methods .....	631
6.1.23	<b>Product Subclass 23: Alk-1-ynylboranes and Alkyn-1-ylboronates</b> D. E. Kaufmann and N. Öcal	
<hr/>

<b>6.1.28.7</b>	Method 7: Hydroboration of Alkynes and Allenes .....	731
<b>6.1.28.7.1</b>	Variation 1: With Borane .....	731
<b>6.1.28.7.2</b>	Variation 2: With Monosubstituted Boranes .....	731
<b>6.1.28.7.3</b>	Variation 3: With Disubstituted Boranes .....	734
<b>6.1.28.7.4</b>	Variation 4: Catalyzed Hydroboration .....	757
<b>6.1.28.8</b>	Method 8: Hydrozirconation of Alkynylboranes .....	762
<b>6.1.28.9</b>	Method 9: Hydrogenation of Alkyn-1-ylboranes .....	762
<b>6.1.28.10</b>	Method 10: 1,1-Organoboration of Alkynes .....	763
<b>6.1.28.11</b>	Method 11: Allylboration of Alkynes .....	767
<b>6.1.28.12</b>	Method 12: Carbometalation of Alkynylboranes .....	769
<b>6.1.28.13</b>	Method 13: Haloboration of Alkynes .....	770
<b>6.1.28.14</b>	Method 14: Boracyclopropenation of Alkynes .....	771
<b>6.1.28.15</b>	Method 15: Catalyzed Dimetalation .....	772
<b>6.1.28.15.1</b>	Variation 1: Diboration of Alkynes, Allenes, and Methylidenecyclopropanes .....	772
<b>6.1.28.15.2</b>	Variation 2: Sulfanylboration of Alkynes .....	779
<b>6.1.28.15.3</b>	Variation 3: Silaboration of Alkynes, Allenes, and Alkylidenecyclopropanes ..	780
<b>6.1.28.15.4</b>	Variation 4: Stannaboration and Germaboration of Alkynes and Allenes ..	789
<b>6.1.28.15.5</b>	Variation 5: Boraruthenation of Alkynes .....	792
<b>6.1.28.16</b>	Method 16: By Rearrangement of Trialkyl(alkynyl)borates .....	793
<b>6.1.28.17</b>	Method 17: By Diels–Alder Reactions of Dienylboronates and Alkynylboranes .....	795
<b>6.1.28.17.1</b>	Variation 1: From Alkynylboranes and Dienes .....	795
<b>6.1.28.17.2</b>	Variation 2: From Dienylboronates and Dienophiles .....	796
<b>6.1.28.18</b>	Method 18: Radical Additions to Alkynylboranes .....	798
<b>6.1.28.19</b>	Method 19: Photolytic Rearrangement of Alkynylboranes .....	799
<b>6.1.28.20</b>	Method 20: By the Isomerization of Allylboranes .....	800
	Applications of Product Subclass 28 in Organic Synthesis .....	801
<b>6.1.28.21</b>	Method 21: Formation of a Metal–Carbon Bond .....	801
<b>6.1.28.22</b>	Method 22: Formation of a Heteroatom–Carbon Bond .....	804
<b>6.1.28.22.1</b>	Variation 1: Halogen–Carbon Bonds .....	804
<b>6.1.28.22.2</b>	Variation 2: Chalcogen–Carbon Bonds .....	813

6.1.28.22.3	Variation 3:	Nitrogen—Carbon and Oxygen—Carbon Bonds	813
6.1.28.22.4	Variation 4:	Group 14 Metal—Carbon Bonds	814
6.1.28.23	Method 23:	Formation of a C—C Bond	815
6.1.28.23.1	Variation 1:	With $\alpha$ -Boron Substitution	815
6.1.28.23.2	Variation 2:	Carbometalation Reactions	818
6.1.28.23.3	Variation 3:	Radical Addition Reactions	820
6.1.28.23.4	Variation 4:	Cyclopropanation Reactions	824
6.1.28.23.5	Variation 5:	By Alkene Cross-Metathesis	827
6.1.28.23.6	Variation 6:	Homologation Reactions	828
6.1.28.23.7	Variation 7:	By Isomerization	829
6.1.28.23.8	Variation 8:	Pericyclic Reactions	830
6.1.28.23.9	Variation 9:	Cross-Coupling Reactions	837
6.1.28.23.10	Variation 10:	1,4-Addition Reactions	841
6.1.28.23.11	Variation 11:	Multicomponent Reactions	843
6.1.28.23.12	Variation 12:	Boron-Stabilized Alkenyl Carbanions	844
6.1.29	<b>Product Subclass 29: <math>\alpha</math>-Boryl Carbonyl Compounds</b>		
	H. Abu Ali, V. M. Dembitsky, and M. Srebnik		
<hr/>			
6.1.29	<b>Product Subclass 29: <math>\alpha</math>-Boryl Carbonyl Compounds</b>		855
	Synthesis of Product Subclass 29		855
6.1.29.1	Method 1:	Synthesis of 5-Ethyl-2,3-dimethyl-2,3-dihydro-1,2,3-diazaborine-4-carbaldehyde by Halogen Replacement	855
6.1.29.2	Method 2:	Synthesis of 5-(Dihydroxyboryl)uracil by Halogen–Metal Exchange	856
6.1.29.3	Method 3:	Formation of $\alpha$ , <i>N</i> -Borylamides by Substitution	856
6.1.29.4	Method 4:	Metal-Exchange Reactions of Diazo Compounds	856
6.1.29.5	Method 5:	Reaction of Bis(methoxycarbonylmethyl)mercury with Alkylbromo(dimethylamino)boranes	857
6.1.29.6	Method 6:	Hydroboration of Functionalized Alkenes	857
6.1.29.7	Method 7:	Hydroboration of Methyl 2-(Acetylamino)acrylate	858
6.1.29.8	Method 8:	Hydroboration of Unsaturated Esters	858
6.1.29.9	Method 9:	Hydroboration of Enehydrazones	858
6.1.29.10	Method 10:	Aminoboration of Ketene	859
6.1.29.11	Method 11:	Haloboration of Triple Bonds	860
6.1.29.12	Method 12:	Ozonolysis of (Trifluoromethyl)(trifluorovinyl)boron Derivatives	861
6.1.29.13	Method 13:	Synthesis of Quinone Boronates	861
	Applications of Product Subclass 29 in Organic Synthesis		863
6.1.29.14	Method 14:	Synthesis of Novel Alkaloids	863
6.1.29.15	Method 15:	$\alpha$ -Alkyl Ketones by the Reaction of Trialkylboranes with $\alpha$ -Bromo Ketones	863

<b>6.1.34.13</b>	Method 13: Carbaboration .....	938
<b>6.1.34.14</b>	Method 14: Dichloromethyl Methyl Ether Reaction .....	938
<b>6.1.34.15</b>	Method 15: Cross-Coupling Reaction .....	939
<b>6.1.34.16</b>	Method 16: Formation of Benzylborates .....	940
<b>6.1.34.16.1</b>	Variation 1: Benzylborohydrides .....	940
<b>6.1.34.16.2</b>	Variation 2: Alkylarylbenzylborates and Benzylcyanoborates .....	940
<b>6.1.34.17</b>	Method 17: Transmetalation .....	941

**6.1.35 Product Subclass 35: Allylboranes**

Y. Bubnov

<b>6.1.35</b>	<b>Product Subclass 35: Allylboranes</b> .....	945
	Synthesis of Product Subclass 35 .....	949
<b>6.1.35.1</b>	Method 1: Transmetalation .....	949
<b>6.1.35.1.1</b>	Variation 1: From Allylic Tin Compounds and Boron Halides .....	949
<b>6.1.35.1.2</b>	Variation 2: Via Aluminum Sesquibromides .....	955
<b>6.1.35.1.3</b>	Variation 3: From Allylmagnesium Halides .....	956
<b>6.1.35.1.4</b>	Variation 4: From Alkenes via Lithium and Potassium Derivatives .....	965
<b>6.1.35.1.5</b>	Variation 5: Via Lithiation of Penta-1,3- and Penta-1,4-dienes, Polyenes, and Aromatic Compounds .....	972
<b>6.1.35.1.6</b>	Variation 6: Via Lithiated Allylic Halides, Ethers, Sulfides, and Selenides ..	980

6.1.35.1.7	Variation 7:	From Allylsilanes .....	989
6.1.35.2	Method 2:	By Hydroboration .....	990
6.1.35.2.1	Variation 1:	Via Hydroboration of Propargyl Compounds .....	990
6.1.35.2.2	Variation 2:	Hydroboration of Allenes .....	994
6.1.35.2.3	Variation 3:	Hydroboration of 1,3-Dienes .....	998
6.1.35.2.4	Variation 4:	Hydroboration–Cyclization of 1-En-3-yne .....	1000
6.1.35.3	Method 3:	Haloboration of Allenes .....	1001
6.1.35.4	Method 4:	Diboration, Silaboration, and Stannaboration of 1,3-Dienes and Allenes .....	1002
6.1.35.4.1	Variation 1:	Diboration of 1,3-Dienes and Allenes .....	1002
6.1.35.4.2	Variation 2:	1,4-Silaboration of 1,3-Dienes .....	1006
6.1.35.4.3	Variation 3:	1,4-Stannaboration of 1,3-Dienes and Allenes .....	1007
6.1.35.5	Method 5:	From 1,3-Dienylboranes via Diels–Alder Reaction .....	1008
6.1.35.6	Method 6:	Cross-Coupling Reactions of Diborane Derivatives with Allylic Acetates .....	1011
6.1.35.7	Method 7:	From Trialkyl(alkynyl)borates via a 1,2-Anionotropic Rearrangement .....	1012
6.1.35.8	Method 8:	From Trialkylboranes and Alkynyl Derivatives of Tin and Silicon .....	1014
6.1.35.9	Method 9:	Homologation of Vinylic Boranes .....	1016
6.1.35.10	Method 10:	Vinylation of Haloalkylboron Derivatives .....	1019
6.1.35.11	Method 11:	From Triallylboranes .....	1025
6.1.35.11.1	Variation 1:	Redistribution Reactions with Boric and Thioboric Esters ...	1025
6.1.35.11.2	Variation 2:	Reactions with Protolytic Reagents .....	1026
6.1.35.11.3	Variation 3:	Reactions with Carbonyl Compounds, Acids, and Esters ...	1030
6.1.35.11.4	Variation 4:	Reactions with Nitriles and Imines .....	1031
6.1.35.11.5	Variation 5:	Reaction with Cyclopropenes .....	1033
6.1.35.12	Method 12:	From Triallylic Organoboranes and Alkynes or Allenes .....	1035
6.1.35.12.1	Variation 1:	Diallyl(penta-1,4-dienyl)boranes .....	1036
6.1.35.12.2	Variation 2:	1-Allylborin Derivatives .....	1039
6.1.35.12.3	Variation 3:	3-Allyl-3-borabicyclo[3.3.1]non-6-enes .....	1040
6.1.35.12.4	Variation 4:	Reactions of Allylic Boranes with Allenes .....	1041
6.1.35.13	Method 13:	From Aminoboranes via [2 + 4]-Cycloaddition and Ene Reactions .....	1042
6.1.35.14	Method 14:	Via Ring Closure and Cross-Metathesis .....	1043
6.1.35.15	Methods 15:	Miscellaneous Methods .....	1046
		Applications of Product Subclass 35 in Organic Synthesis .....	1054
6.1.35.16	Method 16:	Complexation .....	1054
6.1.35.17	Method 17:	Allylboration of Organic Compounds Containing a Multiple Bond .....	1054
6.1.35.18	Method 18:	Reductive Mono- and <i>trans</i> - $\alpha,\alpha'$ -Diallylation of Aromatic Nitrogen Heterocycles with Allylic Boranes .....	1055
6.1.35.19	Methods 19:	Miscellaneous Applications .....	1056

<b>6.1.36</b>	<b>Product Subclass 36: <math>\beta</math>-Boryl Carbonyl Compounds</b>

	Synthesis of Product Subclass 38	1098
<b>6.1.38.1</b>	Method 1: Hydroboration of Alkenes	1098
<b>6.1.38.1.1</b>	Variation 1: With Borane Complexes	1104
<b>6.1.38.1.2</b>	Variation 2: With Monoalkylboranes	1106
<b>6.1.38.1.3</b>	Variation 3: With Dialkylboranes	1109
<b>6.1.38.2</b>	Method 2: Hydroboration of Dienes	1116

6.1.38.2.1	Variation 1:	With Borane Complexes .....	1116
6.1.38.2.2	Variation 2:	With Monoalkylboranes .....	1118
6.1.38.3	Method 3:	Hydroboration of Functional Derivatives of Alkenes .....	1120
6.1.38.4	Method 4:	Hydroboration of Alkynes .....	1123
6.1.38.5	Method 5:	Transmetalation .....	1123
6.1.38.5.1	Variation 1:	With Boron Halides and Tetrahaloborates .....	1125
6.1.38.5.2	Variation 2:	With Boron Alkoxides .....	1126
6.1.38.6	Method 6:	Isomerization .....	1128
6.1.38.7	Method 7:	Displacement .....	1130
6.1.38.8	Method 8:	Redistribution .....	1131
6.1.38.9	Method 9:	Pyrolysis .....	1132
6.1.38.10	Method 10:	Hydrogenation .....	1133
6.1.38.11	Method 11:	Organoborate Rearrangements .....	1134
6.1.38.11.1	Variation 1:	Homologation by Carbonylation .....	1135
6.1.38.11.2	Variation 2:	Homologation by Substituted Methyl Carbanions .....	1136
6.1.38.11.3	Variation 3:	Cyclization of $\alpha,\alpha$ -Bis(dialkylboryl)- $\omega$ -haloalkanes .....	1138
6.1.38.12	Method 12:	The Diels–Alder Reactions of Vinylic Dialkylboranes .....	1139
		Applications of Product Subclass 38 .....	1140
6.1.38.13	Method 13:	Protonolysis .....	1141
6.1.38.14	Method 14:	Oxidation .....	1142
6.1.38.14.1	Variation 1:	Oxidation to Alcohols .....	1142
6.1.38.14.2	Variation 2:	Oxidation to Hydroperoxides .....	1144
6.1.38.14.3	Variation 3:	Oxidation to Aldehydes and Ketones .....	1144
6.1.38.14.4	Variation 4:	Oxidation to Acids .....	1145
6.1.38.15	Method 15:	Amination .....	1146
6.1.38.15.1	Variation 1:	Primary Amines .....	1146
6.1.38.15.2	Variation 2:	Secondary and Tertiary Amines .....	1148
6.1.38.16	Method 16:	Halogenolysis .....	1150
6.1.38.16.1	Variation 1:	Chlorinolysis .....	1150
6.1.38.16.2	Variation 2:	Brominolysis .....	1152
6.1.38.16.3	Variation 3:	Iodinolysis .....	1154
6.1.38.17	Method 17:	Sulfidation .....	1155
6.1.38.18	Method 18:	Transmetalation .....	1156
6.1.38.18.1	Variation 1:	Formation of Alkyl Selenides and Alkyl Tellurides .....	1156
6.1.38.18.2	Variation 2:	Formation of Alkylmercurials .....	1157
6.1.38.18.3	Variation 3:	Formation of Dialkylzincs from Trialkylboranes .....	1158
6.1.38.19	Method 19:	$\alpha$ -Bromination–Transfer .....	1160
6.1.38.20	Method 20:	Single-Carbon Insertion Reactions .....	1162
6.1.38.20.1	Variation 1:	Carbonylation of Trialkylboranes .....	1163
6.1.38.20.2	Variation 2:	Cyanidation .....	1165
6.1.38.20.3	Variation 3:	The $\alpha,\alpha$ -Dichloromethyl Methyl Ether Reaction and Related Reactions .....	1166
6.1.38.21	Method 21:	$\alpha$ -Alkylation of Carbonyl Compounds, Nitriles, and $\alpha$ -Heterosubstituted Carbanions .....	1167
6.1.38.21.1	Variation 1:	Alkylation of $\alpha$ -Halogenated and $\alpha,\alpha$ -Dihalogenated Carbonyl Compounds .....	1168

6.1.38.21.2	Variation 2:	Alkylation of $\alpha$ -Diazocarbonyl Compounds, and Other Diazo Compounds .....	1169
6.1.38.21.3	Variation 3:	Alkylation of $\alpha$ -Halogenated and $\alpha,\alpha$ -Dihalogenated Nitriles .....	1170
6.1.38.21.4	Variation 4:	Alkylation of Other $\alpha$ -Heterosubstituted Carbanions .....	1171
6.1.38.22	Method 22:	Reaction of Organoborates with Electrophiles .....	1173
6.1.38.22.1	Variation 1:	Alkenyltrialkylborate Rearrangements .....	1175
6.1.38.22.2	Variation 2:	Trialkyl(alkynyl)borate Rearrangements .....	1176
6.1.38.23	Method 23:	Small Ring Formation .....	1182
6.1.38.24	Method 24:	Coupling of Alkyl Groups Attached to Boron .....	1183
6.1.38.25	Method 25:	The Cross-Coupling Reaction .....	1184
6.1.38.25.1	Variation 1:	Cross Coupling of Trialkylboranes .....	1185
6.1.38.25.2	Variation 2:	Carbonylative Cross Coupling of Trialkylboranes and Acyl-Alkyl Coupling .....	1187
6.1.38.26	Method 26:	Free-Radical Reactions .....	1188
6.1.38.26.1	Variation 1:	Conjugate Addition Reactions .....	1188
6.1.38.26.2	Variation 2:	Alkylation of 1,4-Quinones .....	1190
6.1.38.26.3	Variation 3:	Trialkylborane-Induced Reactions .....	1191
6.1.38.26.4	Variation 4:	Other Free-Radical Reactions .....	1192
6.1.38.27	Method 27:	1,2-Addition to Carbonyl Compounds .....	1193
6.1.38.27.1	Variation 1:	Reduction of Carbonyl Compounds .....	1193
6.1.38.27.2	Variation 2:	The Boron-Wittig Reaction .....	1195
6.1.38.27.3	Variation 3:	Alkylation of Aryl Aldehyde Tosylhydrazones .....	1197
6.1.38.28	Method 28:	Formation of Di- and Trialkylborohydrides .....	1198
6.1.38.28.1	Variation 1:	Dialkylborohydrides .....	1198
6.1.38.28.2	Variation 2:	Trialkylborohydrides .....	1199

### 6.1.39 Product Subclass 39: Tetraaryl- and Tetraalkylborates and Related Organometallic Compounds

D. E. Kaufmann and M. Köster

6.1.39	<b>Product Subclass 39: Tetraaryl- and Tetraalkylborates and Related Organometallic Compounds</b> .....	1217
	Synthesis of Product Subclass 39 .....	1217
6.1.39.1	Method 1: Tetraarylborates and Mixed Alkylarylborates from Aryl-lithiums, Grignard Reagents, or Related Compounds and Boranes .....	1217
6.1.39.2	Method 2: Trialkylvinylborates from Organolithium Compounds and Boranes .....	1219
6.1.39.2.1	Variation 1: Vinylation of Trialkylboranes .....	1219
6.1.39.2.2	Variation 2: Alkylation of Vinylboranes .....	1220
6.1.39.3	Method 3: Synthesis of Ethynyltriorganoborates from Metalated Alkynes and Boranes .....	1220
6.1.39.3.1	Variation 1: From Alkali Acetylides or Acetylenic Grignard Compounds and Boranes .....	1220
6.1.39.3.2	Variation 2: From Hydrotriorganoborates and Alkynes .....	1221
6.1.39.4	Method 4: Synthesis of Tetraorganoborates from Alkylolithiums and Organoboranes .....	1221

	Applications of Product Subclass 39 in Organic Synthesis	1222
6.1.39.5	Method 5: Formation of C—C Bonds	1222
6.1.39.5.1	Variation 1: Arylations and Alkylations of Halides, Pseudohalides, and Heterocycles	1222
6.1.39.5.2	Variation 2: Synthesis of Terminal Allenes	1224
6.1.39.5.3	Variation 3: Arylations and Alkylations of Acid Halides	1225
6.1.39.5.4	Variation 4: Synthesis of Biaryls	1225
6.1.39.5.5	Variation 5: Synthesis of Alkyl-Substituted Aromatic Heterocycles	1226
6.1.39.5.6	Variation 6: Addition/Rearrangement Reactions of Trialkyl(ethynyl)borates	1228
6.1.39.6	Methods 6: Other Applications	1230
6.1.40	<b>Product Subclass 40: Carboranes and Metallacarboranes</b> F. Teixidor and C. Viñas	
6.1.40	<b>Product Subclass 40: Carboranes and Metallacarboranes</b>	1235
	Synthesis of Product Subclass 40	1242
6.1.40.1	Method 1: Synthesis of Monocarboranes	1242
6.1.40.2	Method 2: Synthesis of Dicarboranes	1246
6.1.40.3	Method 3: Synthesis of Anionic <i>closo</i> -Metallacarboranes	1247
6.1.40.4	Method 4: Synthesis of Neutral <i>closo</i> -Metallacarboranes with Phosphine Ligands	1252
6.1.40.5	Method 5: Synthesis of Forced <i>exo-nido</i> -Metallacarboranes with Sulfanyl- and Phosphine Ligands	1254
6.1.40.6	Method 6: Synthesis of Neutral <i>closo</i> -Metallacarboranes with Allyl Ligands	1258
6.1.40.7	Method 7: Synthesis of Neutral Charge-Compensated Sulfonium <i>closo</i> -Metallacarboranes	1259
	Applications of Product Subclass 40 in Organic Synthesis	1260
6.1.40.8	Method 8: Stabilization of Carbenium Ions	1260
6.1.40.8.1	Variation 1: Synthesis and Stabilization of the <i>tert</i> -Butyl Cation	1261
6.1.40.9	Method 9: Icosahedral Borane Anions for Cation Precipitation	1262
6.1.40.9.1	Variation 1: Precipitation of Speciality Cations	1262
6.1.40.9.2	Variation 2: Anionic Carborane Clusters as Supramolecular Chemistry Models for Convex Surfaces	1263
6.1.40.10	Method 10: Hydrogenation of Alkenes	1263
6.1.40.10.1	Variation 1: Terminal Alkene Hydrogenation Using <i>closo</i> - and <i>exo-nido</i> -Rhodacarborane Clusters	1263
6.1.40.10.2	Variation 2: Terminal Alkenes Hydrogenation Using Forced <i>exo-nido</i> -Monosulfanyl- and <i>exo-nido</i> -Monophosphinorhodacarboranes	1264
6.1.40.10.3	Variation 3: Internal Alkenes by Hydrogenation Using <i>closo</i> - and <i>exo-nido</i> -Monosulfanylrhodacarboranes	1266
6.1.40.11	Method 11: Kharasch Addition to Alkenes	1267

<b>6.1.41</b>	<b>Product Subclass 41: Boron-Containing Polymers</b>	
	D. Gabel	
<hr/>		
<b>6.1.41</b>	<b>Product Subclass 41: Boron-Containing Polymers</b> .....	1277
	Synthesis of Product Subclass 41 .....	1277
<b>6.1.41.1</b>	Method 1: Polymerization by a Dehydration Reaction between Polyols and Boronic Acids .....	1277
<b>6.1.41.2</b>	Method 2: Polymerization by Hydroboration .....	1278
<b>6.1.41.2.1</b>	Variation 1: Of Dienes .....	1278
